CHAPTER – 01

AMERICAN CAPITALISTIC SOCIETY DECLINES!

1.1 MIGRATION TO SOUTH AMERICA AND CENTRAL AMERICA:

After Christopher Columbus discovered American continents for Spanish kingdom started European migration. The Spanish conquerors plundered south and central American continent by enslaving, killing and converting native Americans. In addition, infected local people with diseases like small pox, cholera and others for which local people had no resistance. American continent had many tribes of American Indians who differed in their color, culture and language. Many tribes completely vanished and many tribes became mixed races. Even then many original native American Indians are still living with their culture and languages. Civilizations comparable to Egyptian civilizations flourished in past evidenced by monuments left behind by them. Spaniards and Portuguese brought slaves from Africa. And they intermixed and as a result European-African-American Indian mixed race began to inhabit Latin America and Central America. This created a continent of Spanish and Portuguese speaking Hispanic Americans and American Indians. British started US immigration from south coast and east coast of North America. Other European nation also started to migrate to North America. They all became North Americans. British established ruling colonial government. English became official language. Early pioneers socialistic to their own race and distributed occupied land at the rate of one square mile for four families. European families started life in equality. They all had same educational and technical skill. So, every couple had opportunity to build a mansion at a suitable location in a 140 acres plot. They had plenty of timber in their own land. During a short period of hard-work achieved prosperity of big land lords of Europe. This brought them new social status and created excellent family life under most congenial atmosphere which resulted in rapid explosion of 'Christian European (CE)' population. Early immigrants were only 15 million CE and imported about same number of black slaves. Latter about 100,000 Chinese brought from China to build railway. Now live in China Towns all over America. Japanese came as gardeners. Later Indian and others migrated to USA. This stock expanded by year 1992 to 250 million.

1.2 NORTH AMERICAN CHRISTIAN EUROPEAN INDUSTRIAL SOCIETY:

Swedish Catholic women delivered up to 13 children and Catholics looked to Rome for economic and spiritual leadership. Swedish King proclaimed Protestantism as national religion and himself as head of Swedish Protestant Church. King nationalized all Swedish Catholic Churches and its assets and commanded that all subjects to become Protestants. Approved right for abortion. Protestant Swedes granted equality, fraternity and freedom to date and enjoy sex without babies.

Kissing, hugging and pair dancing encouraged as good cultural practices to build harmonious homogenized close-knit nations of one for all and all for one. Swedish Feminist women performed industrial jobs like men; self-sustained and acquired sex equality with economic independence. Swedish 'Labor Market Training (LMT)' paid wages for unemployed to fit in with market jobs created assurance of life. From early childhood Swedish primary school trained boys and girls to hug all others of opposite sex in classroom and broke childhood fear of opposite sexes. At budding of life, class rooms broke barriers of classes and religions amongst boys and girls of a classroom. Swedish pupils eat national lunch and lived as one family in a classroom. First blossom of life for girl occurred during 10 to 17 years of age. School taught techniques to avoid 'Sexually Transmitted Diseases (STD)' and pregnancy. Girls enjoyed non-populating Krishna sex with immature fellow boys. Schools and colleges granted academic freedom for falling in love. Second blossoms of life occurred between 16 to 25 years of age. Swedes pursued college education or trained as skillful work force and co-habit without bearing children. In third blossoms of life workers lived together as pair with fellow workers. Paired couples enjoyed love-sex without pregnancies up to 34 years. In first three blossoms of life up to 34 years men and women eliminated sex tensions by sex clubs, sex shows, sex films, pornography, sex movies, live sex shows, sex with or without sex partners with sex tools, Sweden permits use of condoms, pills and safer abortions. First delivery age of women increased to 35-year of age and delayed up to 50 years of age. Swedes reduced living generations in family tree by bearing children in fourth blossom of life that occurred between 35 to 50 years of age. Women's life expectancy increased to 88 years. Pairs living average age reduced to 15 years. Swedes reduced lifetime childbirth to 1.7. Monaco royal family of Europe 700-year old. After death of King unmarried Prince at 40 years of age ascended throne since had a son by cohabitation. Christen Kings did not populate nation by own offspring like Afro-Asians.

1.3 'CHRISTIAN EUROPEAN (CE)' AGRICULTURAL EMPIRE:

During early periods of twentieth century, CE occupied more than half world land area. In many areas exterminated native inhabitants. Then established a vast empire which extended to all continents. In best farming lands of USA, Canada, Australia and Argentina, the 15 million CE established huge mechanized farming industry that produced same amount of surplus salable food equivalent to 1500 million traditional farmers of underdeveloped countries. Amongst them could not find any natives of those countries such as Red Indians or Aborigines. These advanced countries use all their military and industrial might to boost their export trade and dumped with support of third world politicians.

1.4 CHRISTIAN EUROPEAN CAPITALISTIC SOCIETY:

Adventurous people migrated to USA became evil capitalistic society. Their

first experience was to face native American who was a hunter and was hospitable to settlers. Greedy settlers seek land since they could not live in their native country due to population explosion and famine. They fought with primitive society who did not have modern weapon and succeeded in annihilating them for their own survival. They believed in survival of fittest. This experience gave fundamentals of gun boat diplomacy principles of might is right. So, they encouraged research and development to discover modern weapons so that they would have a superior weaponry to become victorious. For this purpose, inventive capacity of human accepted by them as a capital. They gave legal protection for this capital covered by patent laws which encouraged industrial inventions in USA. Thomas Alva Edison invented more than 300 items which included electric bulb. They accepted rights of industrialist to hire and fire workers. Industrialists, big farmers, bankers, inventors, technologists and scientists became leaders of industrial society. This system encouraged larger farms and bigger industries. Production rose rapidly. Skills and talents of people multiplied many folds. New products and services developed which resulted in creating many new jobs and professions to establish most modern industrial empire on this virgin land in a short period. US system named capitalistic system. Many eminent Americans contributed for development of modern American industrial society. Amongst them Henry Ford, notable person who demonstrated how rationalization of production relieved human society of many drudgeries of traditional production methods. Thousands of years ago Indian bullock carts invented. Even today wheel of one bullock cart cannot be exchanged with another cart. In early period car was also built in the same way. Axle of one car could not be inter changed with another. Each car was produced and assembled as a separate unit. This involved lot of labor. As a result, workers forced to work longer hours and paid lower salary. Instead of assembling a car as a separate unite like building a ship he introduced conveyer system to assemble car. Any component of one car could be interchanged with cars of same model. Worker assembled axle carried out only that job. Worker fitted door did that job only. In this method of division and specialization technique, productivity and efficiency of workers increased many folds. This method helped Henry Ford a revolutionary to increase wages of his workers and reduced working hours. Standardization played major role in mass production which reduced production cost and sales increased many folds. Capitalistic inventor and producers contributed for increasing productivity of human society. They believed that organized labor union leader middle man between producer and workers. Capitalist believed that middle man did not contribute anything to productivity of nation.

1.5 FARM SUBSIDY TO CE AND DUMPING OF GRAINS IN THIRD WORLD:

Super power USA supplied diesel and petrol at 20% of international selling price to its farmers and in addition subsidized farmers. Total population dependent on farming only five million. USA used all its financial and military might to export

its agricultural products to whole world. As a result, market prices in third world lowered. Poor traditional farmers could not compete with these farmers. Many third world leader sales agents of US department of agriculture. These leaders served interest of mechanized agricultural and military powers. Today rural America has 5 million families out which 93% working in non-farming employment. Industrialization enabled mechanization of these farms. American farm lands about 965 million acres divided into two million farms. Out of these 97% are family farms. Amongst agricultural productions of these farms 1/3 is produced by 200000 farms. The small farming families are 1.5 million with an average land holding of 65 acres, cattle and sheep. These managed by a husband and wife as part time farmers. Both of them work as employees in manufacturing industries in their area and more than 50% of their income come from non-farm work. Their agricultural dollar value of production less than \$ 40,000. There are about 0.5 million medium farmers and they have up to 600 acres. In this husband is the full-time farmer and wife takes up full time employment in non-farm jobs and annual agricultural productions less than \$ 50,000. In large family farms sons become partners to reduce inheritance tax. As a result, average farming family income almost equal to industrial workers. American government generous to pay subsidy to farmers and in one particular year paid 20 billion dollars. It depends on how much market price lower than profitable prices for farmers. US government generous to its farming sector.

1.6 ESTIMATION OF SINS OF CHRISTIAN EUROPEAN:

Let us study world's development problems with reference to Hindus religion. Action can be good or bad. Good action is Dharma and effect of bad action is karma. Good actions bring us bliss. Bad actions bring us evil karma. European colonial powers occupied lands inhabited by primitive people by killing them in unfair war by use of modern weapons. According to Mahabharata this is a big sin. Colonization of traditional and tribal societies involved treachery and other crimes. Once they have become rulers, they enslaved fifteen million black Africans and exploited them for many generations. Later when they started Industrial production of machine-made cloth; dumped them by imperialistic trade in colonies by destroying native hand loom weavers' traditional market without providing alternate source of income which resulted in death of many millions in India and in other countries. They mass produced opium and sold to Chinese People. CE chosen best agricultural lands in all continents and developed most modern mechanized agricultural farms. These farms are in the USA, Canada, Australia, New Zealand, South Africa and Argentina. These mechanized farms produce enormous quantity of surplus food. These farms are owned by just 15 million 'Christian European (CE)'. Surplus food produced by these 15 million CE farmers are equivalent to surplus salable production of 1500 million traditional farmers of third world. These mechanized farming countries have enormous armament industry and exports weapons. They dump grains in third world countries and reduced market price of

agricultural products. They use all their military and financial assistance program to dump their agricultural surplus. Third world countries have been made democratic while the major population illiterate and cannot understand how employment created in an industrial society. They elect politician who will reduce food price. As a result, basic agricultural economy of these developing countries suffered. Low agricultural prices-result in slow death of 1000 million farming dependent people. India has 70 percent of people living in villages and they depend on farming. Indian Government fixes very low price for grains. Industrialized nations purchased third world leaders and made them to sign many agreements to sell their oars, minerals, petroleum and other resources at very low prices. They have installed puppet kings and dictators to rule many developing countries. These kings and dictators transfer national wealth to these countries for promise of citizenship and protection when native people drive them out. Rich people transfer wealth to these industrialized CE nations also offered citizenship like brilliant third world citizens. Thus, exploit third world.

1.7 AMERICA IS NOT ANY MORE A BIOLOGICAL NATION:

The 1970 black riots proved America is not any more a truly biological nation. A new dissatisfied group raising up in America. African black mother and European father offspring remained in USA as black people with white gens 95% but due to strong physical futures of the African appearance looks more African than European. They remember their past slaveries in this country and speaks English with Afro-American dialect. Afro-American with civil liberties mixed at a faster rate. USA is dominated by black music, culture and art. Once any race mixes with black race, children are identified as black. It is expected that percentage of Afro-American continuously increase while pure CE decrease continuously. As a result, black race become dominant race in near future. By year 2000 birth rate of colored children 52%. Another nation-wide white race protection group organized to look after welfare of suffering white population. There are 7.2% unemployment which is an official record. Actual may be more. Number of children raised by independent socially supported single woman raising day by day. Year 1990 figures 20 million. These families lived and experienced poverty. Population of homosexual and lesbian pairs rise in USA. There is also a significant religious puritan supporting pro-life movement. Due to exploitation of labor, a large percentage of American people drug addicts and aids disease spreading. Americans highest per capita drug consumers and highest debtor nation in the world.

1.8 PRESENT AMERICAN CONDITION:

USA very dominant but unfortunately after a short period of time started declining very rapidly. Due to exploitation of labor, a large percentage of American people drug addicts and aids disease spreading. Americans highest per capita drug consumers in the world. They are also the highest debtor nation in the world. Now I

observe that comparatively American industries are in a bad shape. Social conditions are much inferior to Swedish standards. I did not find congenial living conditions. There are plenty of extremists compared to Sweden. America did not nationalize schools and universities. Education is not subsidized and at the same time government did not have proper public educational medium similar to Sweden. Commercial media exploit its people as consumers and did not consider them as human with their innate weaknesses which shall be protected by ethics and morals. Everything is measured in terms of money. Money only reward and other social payments such as respect, regard, and reverence do not have any value. Working man has no savings. Only about 5% of its population may have positive bank balances. If credit card debts are included for evaluation of affluence then USA is not affluent. At present forty million Americans do not have any medical insurance. And about 100 million Americans are under insured. Old age life extended by medical technology which do not make any positive contribution to USA. Life of lonely old people is pitiable. Further due to its exploitation of labor, drug addiction has become a major problem of this country. The increase in number of single parent family in near future accelerate drug problem in USA. The political atmosphere is very much backward since general educational level is much lower than developing countries due to the lack of public education. Due to mechanized food processing, America is largest consumer of junk food. They eat potato chips, candies and other high fat and high calorie diet. They prefer car driving rather than walking. Significant populations are obese. Fat deposition in body significantly reduce efficiency. This is one of the major factors which lead USA into the economic decline. Life expectation in Cuba and USA are same. Restaurant style buffet eating habits tempt people to over eat and spoil their health. As a result, losing figure and have significant abdominal fat, heart disease and cancer. They drink carbonated drinks like coke instead of water. USA is at present colonizing the Middle East oil reserves by supporting a few rulers as figure head in these countries and spend large sums of money to retain these colonies. I think that money spent by USA in its military buildup is not providing cost effective returns to its society except glory of keeping most expensive military machine. USA is supported by Germany, Japan, Taiwan and Korea. USA's imports are higher than its exports. It survives by capital flow from other nations which in turn changes ownership of its land and industries. More and more Americans have foreign employers. This is causing lots of damage to their pride as rich Americans. USA have never been bombed by any other country in this world while its weapons and its bombs are killing and devastating mother earth. How many Americans travel abroad? What is their average period of general education? What percentage of Americans keep up good figure and health? Why they are declining? They do not have good environment for social evolution. Germany, Japan and Italy all completely destroyed after the World War II and they evolved into a superior human society with enormous family savings.

1.9 CORPORATION CONTROLLED MEDIA BRAINWASHED AMERICANS!

Americans are brainwashed people. They buy only brand-named products. So, McDonald and other franchise popular in USA. Motels have to have brand names. These brand names increase cost and discourages real entrepreneurship. Sociologist say that US industries controlled by four major corporations. Their spider net controls every activity in this country. One of their major corporation is General Motors which is planning to retrench 30% of its work force. Its loss in 1991 in North America was 5 billion \$. As these corporations have become too big, become inefficient. They by their monopoly prevent any new entrepreneurship. Major American population become hired and fired employees.

1.10 IN HIRE AND FIRE CAPITALISM CE FEMALE BARE NOT CHILDREN!

Americans applied theory X management on their CE work force. Workers hired and fired as and when needed. Worker has no feelings and binding to his job. USA believed that worker lacks intelligence and he shall be compelled to work. Money only motivating force for work. In USA a significant population is made physically handicapped due to deterioration of health due to tough working conditions. Suffering of unfortunate American workers led to abuse of narcotics and drugs. People exposed to monotonous jobs, risky jobs, dangerous jobs, regular night duty jobs, insecure jobs and social pressures liable for drug addiction. America has traditions of employing slave labor. And after abolition of slave labor hired and fired hourly labor. Workers worked almost as near slave conditions. Presence of significant unemployment, increased insecurity and slave mentality. Management and labor have an unusual relationship in USA. Organized labor has more power. Unorganized labor individualistic. Their capacity to form effective productive group are poor. US provides little public education as a result Americans have very little knowledge about other societies. They believe they enjoy freedom, democracy, richness and prosperity. They are not informed what they do not have. Only top people have good bank balances. Most of them survive by credit card. As the common man have no credit balance; it may result in failure of their banking system. It is likely that many of the US banks may become insolvent in near future. American national debt is 4000 billion dollars of bonds. If they are fully paid by government would create a surplus circulation of dollar in world market. This would reduce value of dollar. To keep value of dollar US federal reserve increases its interest rates to attract foreign deposits. This disrupt industrial investments in USA and lead to decline. USA damaged human wealth of CE population. Mistakes done in USA, Russia, and other countries need not be repeated in India.

1.11 'CHRISTIAN EUROPEAN (CE)' POPULATION DEPOPULATES IN USA:

Colonization and neo-colonization did not create jobs in America. Import of cheap Middle East oil crushed US national oil industry and created unemployment. Insurance based American health care system costs 12% of American GNP and at

the same time 30 million out of 150 million did not have health insurance. And 100 million are under insured while Germany with 8% of its GNP spending provide same standards of health care to its population. By year 2000, 15% of population was colored Afro-American in USA. It was expected that in year 2000 birth of colored children would be more than CE pure children. Obama the Euro-Afro the son of 'Christian European (CE)' mother and African Muslim father became President of USA. After 20 years colored will become adult majority and create a powerful growing colored population. Educational opportunities with civil rights accelerated human evolution of colored populations. Colored competes with CE, the white race. When large percentage of American CE white woman take up employment, birth rate of pure CE white children would reduce.

1.12 REST OF WORLD IMPROVED LOT OF PEOPLE!

US cities are deteriorating. US do not have proper public transport system or health services. It may involve enormous investment to rebuild cities, transport and health care. Many parties are encouraging public to have more children, which would only create great poverty. Institutions like universities have become money driving institutions. They have turned out to be a business enterprise. They grade a student rather than teaching to them. They have very few teaching hours and students learn mostly by self-study. Media such as TV, radio, newspapers and magazines controlled by corporations manipulate peoples demands and aspirations. They swing opinions of American population. They fool whole population and keep them isolated from realities. During past 40 years, rest of world and major races of Asia and Europe have introduced cheaper educational and medical facilities to accelerate human evolution of their people which would only be final winner in race. Leaders of these nations such as Japan, Germany, Sweden, Singapore, Taiwan, and Korea for example persuaded people to follow a particular way of life, which actually accelerated their social evolution and increased average human ability much beyond level of Americans. Recent survey of Taiwan and Korea shows that their teenagers excelled in science and in mathematics compared to their counterparts in USA. We can say that social biological evolution of these people had overtaken American. Real power of a nation that dominates in long run is human potential. USA has failed to provide a general public education to increase wisdom of American people. American may have enormous natural resources and military power but it failed to uplift its population.

1.13 WHY USA FIGHT REVOLUTIONARY MOVEMENTS OF THE WORLD?

Swedish and British who migrated to USA conservatives. Europeans occupied land by mercilessly killing primitive people. Europeans only human society which believes in fighting and killing other weaker human societies. So, they research in military technology and in gun boat diplomacy. How much USA benefitted by fighting Communist in Vietnam, Korea, China, USSR and others? Now how much USA

spending for defense? Can USA stop natural human evolution of this world? More it tries to suppress faster would be evolution. Japan and Germany overtaken USA in many fields. Cuba, Cambodia, Vietnam and China could not be suppressed but only weaker races manipulated by USA. How much it pays extra if Arab oil resources are controlled by one democratic government? The Arabs living in desert would import everything and if increase prices pay more for imports. American decline has a long history. From 1970 USA's imports more than exports. Today not even a single automobile 100% American made even though automobile invented in USA. At that period blacks mostly lived in urban areas. So, to deprive black man of his industrial job shifted labor intensive production overseas and as a result inner city black became unemployed. Capitalistic techniques led to accumulation of wealth and concentration of wealth on a few. Regan Economics accelerated this process and created monopoly in every field. These monopolies are inefficient compared to Japanese corporations and pay very high salary to its corporate administrators. When Toyota took over one of General Motors worst plant and managed it with the same employees proved that actually best of GM's plants. What does this show? This proves that American corporate management utterly wrong. Major Airlines bankrupted and foreign airlines are taking over American Airlines. US major manufacturing base is crumbling. Corporate managers expected to show short term profits so that they could be paid higher allowances. Corporations made one simple decision that is to send all labor-intensive jobs overseas and provide screwdriver jobs to American worker. This fully made immediate short-term profit. But transferred American technological power, innovation and development to overseas. Capitalist created technological overseas base in Pacific region and created industrial power structure overseas. It also made America as biggest consumer nation where imports more than exports. US decline began when imports became more than exports. Industrial might lost when became importing nation. If raw materials exports are not taken into account American industry 30% inferior to world industries. America has a lead in Aerospace, Chemicals, Food, Pharmaceuticals, and others. That is being challenged and soon it would lose its lead in Aerospace and others are struggling. Why USA is in such a bad shape? US saving capacity, educational achievements, technological skill and productivity rapidly declining. For example, in India a single mother can support her son as a doctor and when he graduates, he will not have debts while son of an Indian engineer working in USA when completing his medical education in USA will have 10,000 dollars in debt while both of them would have same skill when they are graduating from their universities.

1.14 USA DEVELOPING INWARD ANTAGONISM!

White immigrants received land freely from the state and accumulated wealth. Blacks brought by force to USA and enslaved for long period have nothing. Many don't own even their homes. KKK would not accept that these former slaves

are to be educated, trained, and corrected for biological defect acquired due to slavery. These blacks are not 100% Africans to be sent back to Africa since they too have CE American gens which gives them genetic right to live in this country. In year 1970, the Afro-American waged civil disobedience movement to get their civil liberties. This was revolution of Afro-American crossbred race. American society as a whole is developing inward antagonism due to its accumulated problems. This would create racial tensions and hatred towards who received public aid. Further USA is being divided into White, Hispanic Afro-American, Asians, Mexicans and so on which increase inward antagonism and prevent USA's aggression overseas. US employers are not having adequate plans to develop their industries like their overseas competitors but follow short sighted approaches. They think that lay off only solution to protect capital. Under open market economy if new industrial production capacities increased, old and inefficient factories have to be closed. New factories of Europe and Asia are more efficient as a result, US factories are being closed. Between 1980 and 1992 about 1.4 million jobs closed in USA. Deficit trade is 20% and this represent weakness of manufacturing industries in USA. Currently technology and capital of Europe, Asia, South America has grown to such positions so as to challenge US domination in capital and technology. Non-American companies have adequate capital while US companies cannot run them competitively. In mean-time suitably evolved Asians and European dominating. Americans are accepting new culture such as JIT. USSR is getting rid of central control to build consumer-based economy which in long run would compete for its market share. This would weaken dollar!

1.15 CHRISTIAN EUROPEANREJECTED CAPITALISTIC ECONOMIC SYSTEM:

American entrepreneurship disappeared since there are no more open opportunity in US for corporation monopoly. So, CE voters defeated outsourced CE capitalists and elected Obama as President of USA! USA must develop a competitive social order incorporating Christian socialism, European patriotism and nationalism to compete with Japanese and 'Workaholic Patriotic Socialist (WPS)' of China who exports more than they import with positive balance of trade surplus. US limit luxury and limit gambling in casinos and betting to make CE bear and rise children.

No	Facts	Action 2020
1	Spaniards and Portuguese brought slaves from Africa to South and Central American Continent and intermixed. CHAPTER – 02

HOW JAPANESE GOVERNMENT OVERRUN AMERICAN CORPORATE CAPITALISM?

After the World War II, Japanese became closest American ally. They worked close to Americans. Americans enjoyed Gisha girls of Japan. During 1970, Toyota company discovered a new production and management system which brought about socioeconomic and technical order which overtook US technology and its industrial power. So, Japanese labor ministry planned social change to combat corporate management of USA. This modern management of Japanese corporation is people-oriented with involvement of all employees on basis of equality in a spirit of a united family enterprise. Employees committed to automation, productivity improvement, technological advancement, continuous education and training. Management by repeated investments in development of equipment and in educating and training its employees devoted for welfare of nation and its employees. They believe that united efforts of workers and management only create wealth and wellbeing to society.

The Japanese social revolution combined traditional Japanese culture with competitive organization for industrial society which demands polarization of thoughts, efforts, skill and technology of many individuals to achieve collective superhuman power to break US Corporate capitalist power. Japanese Corporations offer life time employment, bottom up management which emphasizes importance of group over individual. When Japanese join Corporations, they are making a life time commitment, which Corporation reciprocates. Harmonious productive and creative group is evolved through a life-long process of training, education, collective innovation through group effort. Workers are organized into small groups and intellectuals and expert pinpoint areas and possible alternative course of action for development. Japanese Corporations believe that their work force are creators of wealth and well-being. So, leave choice of innovation and pride of achievement to Japanese workforce. Consensus decisions made during long period of discussions and implemented harmoniously. Invariably most of changes initiated by workers. In Japan dignity dispersed with every Japanese citizen while in USA concentrated on a few. Total dignity of Japanese people remarkably higher than total dignity of people in USA. Swedish society and Japanese societies succeeded in raising dignity of individual. Swedish Prime minister showed passport in airport control point like ordinary citizen even though he need not do it.

o	N Facts	Action 2020
11	Japanese corporation management is people-oriented with involvement of all employees on basis of equality in a spirit of a united family enterprise.	AAL&M national and European national industrial management may incorporate democratic principles in corporate management so that they can

AAL&M nations and industrial management of European nations may incorporate democratic principles in corporate management.

CHAPTER – 03

EUROPEAN COMMUNIST SOCIETY DECLINED!

OBJECTIVE OF COMMUNIST SOCIETIES: Communism based on theory that if labor takes over administration of industries remove unwanted owners and supervisors who controlled workers. Workers made revolutions and took over political power. Communists wanted people have equal quantities of materialistic affluence. Modern materialistic affluence such as buildings, cloths, furnishing, transport facilities and so on produced in massive scale. Enormous quantities of industrial and township waste materials produced in Communist nations which polluted. They produced unlimited quantities of weapons and explosives which may destroy human societies and ecology which enable human life in this earth. Early communists believed that family unit was against Communist ideology and did not encourage family life. Afterwards realized children roaming around street and nobody cared for them. Communists did not believe in God or religion or traditions or moral values. They attach much importance to sexual freedom of individual. Communists build three-tire society. Communist party the top society. Bureaucrats, secret police, army and police become the second-class society. Ordinary people become basic-class society. Basic-class society is actual working and creative group while other groups only administrative and ruling group. Communist party made party men and police as its slave driver. Workers asked to work watched by party men and police. Communist party proved to be incompetent to replace owners and supervisors. After about 40 years, workers found that they were being enslaved by party and party did not know how to run farm or factory. In mean-time purchasing power of capitalist currencies became better. Before unification, value of East German marks was only 15% of West German mark. Slowly one by one people of communist countries revolted and joined 'European Union (EU)' a union of 'European Socialists (ES)'. Communists taught planned economy to third world. They supplied cheaper technical books to propagate Western technology to third world. They fought World War II against colonization of Western powers. Their success in building powerful military forces motivated communist China to become world's non-white power. China incorporated maximum 'Single Child Law (SCL)' and

'Workaholic Socialist Patriot (WSP)' employer whom worked 16-hour day for 7 days a week. Their import was less than exports.

N	FACTS	ACTION 2020
3	1 Communists wanted people to have equal quantities of materialistic affluence such as buildings, cloths, furnishing, transport facilities and so on, European Communist nations produced in massive scale industrial goods; township waste materials and produced unlimited quantities of weapons which may destroy human societies and ecology which enable human life in this earth.	Planning of Communist countries copied by India. Planning is an important tool for building welfare to mankind. India failed since it did not follow Mao maximum SCL; Cultural Revolution; and work for every male and female to build industrial society. It failed to reduce birth rate below death rate to create full employment.
4	1 Communist party proved to be incompetent to replace owners and supervisors. After about 40 years found that workers enslaved by party and party did not know how to run farm or factory.	Den-Shuping gave consumer goods production to 'Foreign Direct Investment (FDI)' to 'Workaholic Socialist patriot (WSP)' employers. So, Yuvan vale appreciates day by day.
5	1 Before unification, value of East German marks only 15% of West German mark. Slowly one by one people of communist countries revolted and joined 'European Union (EU)' a union of 'European Socialists (ES)'.	Value of CE \$ are continuously falling in comparison with Chinese Yuvan and Japanese Yen. By year 2100 Yuvan and Yen will become global trading currency.
6	1 Communist China incorporated maximum 'Single Child Law (SCL)' and 'Workaholic Socialist Patriot (WSP)' employer whom worked 16-hour day for 7 days a week. They import less than exports. China became super economic and military power. Vietnam, Cambodia and Cuba built better nations.	AAL&M nations adopt Mao maximum SCL; Cultural Revolution; male dominated change to feminist; abolish capitalist funded electioneering democracy; and reform capitalist as 'Leader Socialist Patriot (LSP)' employer and workers loyal to LSP employer.

CHAPER – 04

SWEDISH FEMINIST SOCIALIST INDUSTRIAL SOCIETY HAVE MULTI-BLOSSOMS!

PARLIAMENTARY DEMOCRACY IN SWEDEN: In the past, Swedish kings engaged in crusade wars and for this purpose Swedish people fought endless battles. As a result, Swedish people became poor. Slowly Swedish parliament began to restrict powers of king. As Swedish parliament became powerful it did not permit crusade wars and invasions. Sweden became a peace-loving nation. In year 1850, steam driven sawing machines introduced in Sweden. Shock of year 1860 famine was unforgettable for Swedish people and this experience forced people to plan for a famine free land. So, they followed social democracy with family planning. They reduced birthrate and Swedish women increased first childbirth age to establish prosperous society. Enormous forest reserve of Sweden coupled with demand for timber in Europe and America created strong inflow of capital. Swedish timber companies accumulated capital by sale of finished timber products. Capital was utilized by intelligent Swedes to build industrial society. Swedish politicians have been very clever and avoided World War II and developed their industries to a level comparable to that of colonial powers.

POWER GROUPS OF SWEDEN! In Sweden four major power groups came into existence. They are 1. The national employer's union which fights for rights of employer. Swedish industrialists organized a union to fight labor unions. This union has enormous funds to support industries which would suffer losses during a strike. Because of this arrangement Swedish industries are not afraid of strikes. Swedish industries started branches abroad to protect business interests. Employers support political party called Moderate Samlings Party. This party cares for interest of this group. 2. Interest of Swedish farmers are represented by national farmers union. It negotiates prices of agricultural products with government and seeks government assistance for farmers. This group support Center Party and it in turn fight for farmers welfare in parliament. 3. National officers unions organize white-collar workers. This group consists of educated working class of Sweden. They are officials, doctors, engineers, teachers and other high-grade employees. They support Folk Party and it fights for welfare of this groups. 4. Swedish blue-collar workers unions have a national level central organization called Lands Organization for many organized trade union groups. Labor unions demand same salaries throughout the land for same jobs. Labor unions collect very high membership fees and organizes cooperative societies to supply food materials to working population. They save reserve funds to feed workers during lockout periods and to buy shares from industries. National level blue collar workers unions are organized by Social Democrats and they fight for welfare of workers in their Parliament.

WISDOM OF SWEDISH POLITICIANS: In Sweden group democracy prevailed. Every party stands for certain principles and goals. They cooperated even if they

Email: rkabilan1944 @
gmail.com

Visit: www.lalithakabilan.com

could have some agreement in some field which benefit their group interest. Now Social Democrats formed a minority government and they need support of any one of opposition groups. Center party of farmers has 12% representation. They have bargained with government to subsidize milk for their support in parliament so that milk sales would be more and their members would be benefitted. Individuals do not dominate the scene but only their goals, principles and policies that matter. All party leaders care for interest of their group instead of looking for their personal popularity. Social Democrats and Moderate Samlings Party support each other in more than 50% of national issues. Presence of group democracy causes rapid development in Sweden. Rules and regulations changed when ever required. Politicians look after interests of their nation and give adequate support for their industries as well as to their workers. Government gives tax concessions for modernization and for increasing capital investments. This encourages mechanization. Politicians request labor unions to support in modernization and lay off of workers since it increases competitive power of their industry in world market. Workers assured of unemployment allowances and fully paid training for a new carrier by 'Labor Market Training (LMT)' created healthy atmosphere for development.

SWEDISH FARM: With regard to farming Sweden had followed special policies to reduce number of farms and to enlarge them. If a farm had to be sold, government analyzed situation and chose nearest farmer who could annex it so formed better farm. Only farmers permitted to buy farms and land was not allowed to be traded as an investment asset. Farmer received low interest loans for this purpose. Separate department deals with farm enlargement program. This enlargement helped to modernize and mechanize Swedish farming industry. Swedish farmers in unity vote for Centre Party which has interest of farmers as aim of party. Farmers members of only one party and this enabled them to plan very well for development of farming. Swedish farm development program has been a fantastic program which enabled remarkable development in farming technology of Sweden. Indian farms yield only 2% returns on investment while Swedish farms provide 12% return from farming. Lalitha Kabilan during a visit to a Swedish family in a village saw olden day's Swedish farming life. Eldest living member 83 years old had two daughters out of which one was married and had three children. The elderly lady's three brothers and one sister did not get married and their properties inherited by these three grandchildren. This is one of finest examples of how Swedish farmers solved their population explosion and mechanization of farming. They are not doing farming any more but employed in many non-farming jobs. Family planted family lands as Pine 'Rain Forest (RF)'.

'SOCIAL DEMOCRATIC PARTY (SDP)': This party ruled Sweden for about 50 years. 'Social Democratic Party (SDP)' became powerful around year 1935. At this time Nazi party was powerful in Germany and it was spreading in Sweden since it had many historical connections. As Swedish is a Germanic language, many

Swedish people supported Hitler's ideologies. To distract people from Hitler's influence, Social Democrats invented a more nationalistic ideology FOLKHEM. For survival of this small nation, they were compelled to follow a double moral politics and had many different forms. One of them is their NEUTRAL POLICY. This is reflected in all their transactions. This party had controlled workers organizations and struggled for their advancement. Their method had differed from communists. They followed special policies which resulted in raising social, economic, cultural, educational standards of workers in par with their engineers. They had brought equality not by-passing legislation but by raising talents, knowledge, skill, culture, and behavior of all Swedish people to same level. Swedish people respect decisions of their Parliament and strictly follows them. They have full employment and help industries to further export. Swedish capitalist respects workers since Swedish people. They spread policy that any indignity to any Swedish citizen, a Swedish son is indignity to Sweden. Only in Sweden I have seen ministers eating food cooked for common citizen. World war II weakened economy of warring European capitalist countries. Social democrats utilized this opportunity to establish their dream society. During war period Sweden became more prosperous. After war Europe was in ruins and Swedish industries established themselves all over world and brought money to Sweden. This enormous wealth enabled Social Democrats to enforce FOLKHEM which is a special socialistic system of this country which had resulted in raising dignity of humans, animals, birds and nature in addition to vast enviable development of Swedish society. This party encouraged workers to organize unions. In the same way employers also organized unions and introduced many labor-saving techniques. This continuous struggle supported by Social Democrats. They have been providing 'Labor Market Training (LMT)' to workers and helping suffering industries with state aid. As a result, Sweden industrialized quickly. Cooperation between these two groups resulted in mechanization in a well-organized manner as well as reduced population growth to a minimum since workers reduced birth rate to reduce number of new workers. In mean-time living standards, productivity, longevity, health standards, educational level and technical skill developed very fast.

HOW DEVELOPMENT WAS INITIATED? 'Social Democratic Party (SDP)' of Sweden implemented FOLKHEM program envisioned Sweden as one big socialist joint family home where all Swedish people live as members of same family. People taxed according to income and this money distributed to needs of people. Employers collect tax at source from employees and from these tax collections government pays pensions to old people. Evil economic sectors such as sale of alcoholic drink and betting businesses nationalized. Radio and TV made as a medium for educating citizens to participate in building new society. More jobs created under public sector and today 35% of working people receive salaries from government invested industries. These policies developed by SDP. Eminent Swedish people distributed condoms and encouraged family planning. Famine experience

and instinct for survival motivated people to follow family planning. Every one of Swedish women took responsibility on herself to delay child bearing period and learned a profession like man. They reduced numbers of children per family from thirteen to one or two. Eminent Swedish writers from beginning of 20th century spread idealistic modern Swedish culture. They thought ahead of times and spread new ideals of equality of men and women in industrial society and life after mechanization and industrialization of production. They write about industrialization social problems.

PSYCHOLOGICAL TRANSFORMATIONS IN SWEDISH SOCIETY: Swedish people believe in evolution of man. Nature created mankind and mankind shall protect nature. Mankind child of nature and it is duty to preserve nature. Many Swedish people died when they prevented government from felling trees. Swedes did not accept that man shall multiply many folds and occupy earth. Famine experience and suffering made strongest impression in their minds. This influenced their future thoughts and actions. Swedish people transformed into nature worshipers. Amongst Europeans they still hold to their ancient traditions and Gods. They celebrate mid-summer festival which involves sun worshiping. They love forests, seas, lakes, birds, all animals and believe that man who was created by nature had become a great parasite on this earth. His inventions and war machines more than enough to destroy life supporting conditions of this earth. Swedish history reveals that Vikings were sea pirates. Later Swedish kings regularly invaded neighboring countries. Even though their ancestors plundered Europe by piracy and invasions modern Swedish people refused to fight wars. During past one hundred years Swedish population increased from four million to seven million Swedes and one million immigrant non-ethnic Swedish citizens. During this-times they established a prosperous society.

WAR TIME SWEDISH DEVELOPMENT: When war in Europe fought, Swedish women sent to factories to work in shifts to cater to export market. It gave them an opportunity to export their goods overseas and expand their industries. They received about two million immigrants to serve them to build their modern Sweden. Skillful European workers had much to contribute to Sweden in return for their food and shelter. Once conditions of life improved in their home country major group returned back to their home lands. Swedish culture of equality of men and women in building present Sweden increased productivity and capability of Swedish women to a level equal to that of men. Delaying of first pregnancy increased productivity and life expectation of women. On average Swedish women live five years longer than their men and they turn out to be healthier than their men. This could be attributed to delayed pregnancies and reduction in number of child births. This has increased productivity in Sweden and provided advantageous position in their competition for world trade. Soon Sweden realized that woman is more productive than men because she has more patience and dexterity. All industrial jobs requiring finger work better performed by her. As a secretary and as an assistant is better.

Sweden is one of leading countries to employ woman for industrial work. They provide day care centers to take care of children when mothers are working. Swedish men and women share burden of house-keeping and rearing children. Sweden provided modern kitchen facilities to minimize cooking time and cooking problems. Swedish people wish all Swedes live in comfortable houses and eat same quality food without class or status difference in day today life. Swedish people changed their way of life to accommodate women in labor market. Men share household work with women. Men share burden of raising children. Absence of intimate love between husband and wife in industrial society often encourages men to have close relationship with their children. Swedish woman doesn't believe that a woman shall conceive out of lust but prefer to conceive when possibilities to raise a child in better socioeconomic conditions. Child bearing age of woman raised. Working women found it difficult to have more children or to love her legal husband. She had more opportunity to meet many interesting personalities. Average married life reduced to 12 years and average child birth reduced to 1.7 per woman. This increased value of Swedish child. Soon state enacted laws for concessions to have children.

'LABOR MARKET TRAINING (LMT)': Sweden is the first country which observed mechanization create unemployment and require population to undergo training to change carrier in industrial society. They first developed a system which helped unfortunate people who by themselves could not adjust and adapt to changes brought about by industrialization and mechanization since consider Swedish people belong to one single socialist joint family and problems of suffering individuals are of their family. They spend enormous amount of money to rehabilitate violent youths. Government considers all their citizens as their family members. So, they want to give best possible employment opportunities to them. At the same-time supply their industries with well trained workers. They modify capacity and ability of their workers and supply best possible skills to their industry. They achieved by establishing department to train workers to industrial needs by simulating an industrial atmosphere and helping industries employ these people. They have solved this problem through their ARBERT MARKNAD STYRELSEN (Labor Market Directorate). This directorate works for industrial development by assisting industries to create new jobs. They train workers and supply them to industries. In this way they carry burden of training workers which normally undertaken by industries concerned. India could utilize text books used by these training centers to spread technology in India.

SWEDEN PROVIDES JOBS TO ALL TEEN AGERS IN SUMMER: Swedish government believes in motivating young people to work during summer holidays. This is an interesting program of Sweden. Every teen ager has opportunities to work in summer season and earn money. They earn almost same salary as an adult employee. This motivates young people to work and earn their living. Furthermore, working experience motivates them to choose a line of studies to take up special

jobs in future. Boys and girls paid well for their work as pocket money. Swedish children are getting more pocket money in the world. The young people are encouraged to start an independent life by providing single room housing at concessions rates. All youth can take government loans to go for higher education. In this way every Swedish boy and girl can get equal opportunity to go for higher studies and freed from the control of parents. Swedish LMT centers train to work in industries with salary for training period. Teen agers can take up LMT jobs which have current demand. This training molds youngsters to fit with labor market.

SPECIAL FEATURES OF SWEDISH GOVERNMENT: To become eligible for social well-fare everyone pays income tax by gainful legal employment or in business pay tax to gather pension points contribution. Workers are working without any tension in their working place. Sweden has issued number identification for all its citizens. Their computers control all salary payments to all Swedish citizens by income taxes collected at source for employees. All citizens expenses and incomes watched. By taxation system Swedish people earn their livelihood without depending on their parental savings. Many of Swedish sons buy their father's estate by borrowing money from banks. Big business houses plan a system of continuous transfers of their business assets to next generation which encourages transfer of business enterprises to able individuals and they grow in quality, richness and modernity which was recommended by eminent Swedish economist KNUT WICKSELL. During 1960 boom period Sweden introduced very rigid town planning regulations and built up one million apartments for 8 million Swedes. As a result of this modern housing scheme Sweden has a rich appearance and it has the most beautifully planned cities, townships and villages. They follow very rigid standards for all their construction. They have specified standards for houses which are rented out to people and also for ownership houses. For people who cannot afford to pay their rent, local government pays rent. They also have houses for homeless. By this method Sweden manages to avoid slum formation in big cities. All the public places are locked during night to prevent their occupation by alcoholics and vagabond. In this way Sweden imposes specified standards for its citizens. Sweden does not consider it as democratic right of people to sleep in public places which can dirty environment. By this method Sweden had built a clean nation with very high standards of hygiene. Swedish pioneered public health and sanitation. Sweden built by will have suffered people of Sweden utilizing European industrial problems of World War II period. Shock of famine compelled Swedish people to reduce population growth and search for a source of income other than farming which not vulnerable to natural disaster. Migration of 25% of population and death of weaker left a strong and powerful group of survivors who had more land than before. Population growth retarded and capital growth initiated with local population. Export of timber and paper products to USA initiated rapid capital accumulation since industrialist purchased forest from hungry and starving farmers at very low price. Strong parliament stopped all war efforts and encouraged development investments

which resulted in industrial growth. War in Europe enabled rapid industrial development in Sweden to flood world war market with its industrial products.

7	1	Politicians gave adequate support for their industries as well as to their workers. Government gave tax concessions for modernization and for increasing capital investments. This encouraged mechanization.	Workers assured of unemployment allowances and fully paid training for a new carrier by 'Labor Market Training (LMT)' created healthy atmosphere for development.
8	1	If a farm had to be sold, government analyzed situation and chose nearest farmer who could annex it so formed better farm. Indian farms yield only 2% while Swedish farms provide 12% return from farming.	By year 2020 permit only farmers to buy farms. Land not allowed to be traded as an investment asset. Farmer gives low-interest loans for this purpose.
9	1	Social Democrats invented a more nationalistic ideology FOLKHEM for survival of their small nation. They had controlled workers organizations and struggled for their advancement. Their method differed from communists. They followed special policies which resulted in raising social, economic, cultural, educational standards of workers in par with their engineers.	They compelled to follow a double moral politics and had many different forms. One of them their NEUTRAL POLICY. Every teen-ager has opportunities to work in summer season and earn money. They earn almost same salary as an adult employee. This motivates young people to work and earn their living.
0	2	Delaying of first pregnancy increased productivity and life expectation of women. Every one of Swedish women took responsibility on herself to delay child bearing period and learned a profession like man. They reduced numbers of children per family from thirteen to one or two.	By year 2020 spread Swedish culture spread from beginning of 20 th century; the idealistic modern Swedish culture of equality of men and women in industrial society and life after mechanization and industrialization of production.
1	2	Swedish people wish all Swedes live in comfortable houses and eat same quality food without class or status difference in day today life. Swedish people changed their way of life to accommodate women in labor market. Men share household work with women. Men share burden of raising children. Men have close relationship with their children.	Boys and girls paid well for their work as pocket money. Swedish children are getting more pocket money in the world. The young people encouraged to start an independent life by providing single room housing at concessions rates. All youth can take government loans to go for higher education.
2	2	'Labor Market Directorate' works for industrial development by assisting industries to create new jobs. They train workers and supply them to industries. Export of timber and paper products to USA initiated rapid capital accumulation. Strong parliament stopped all war efforts and encouraged development investments which resulted in industrial growth. War in Europe enabled industrial development in Sweden to flood world war market.
3	2	Sweden built by suffered people will by utilizing European industrial problems of World War II period. Migration of 25% of population and death of weaker left a strong and powerful group of survivors who had more land than before. Population growth retarded and capital growth initiated with local population.	By year 2020, enforce Mao maximum SCL; Swedish 35 years motherhood till depopulate to year 1950 level. Nationalize 2/3 FCL and urban land to build RF and socialistic housing. Let farmers use intensive Jewish cultivation with minimum of well water to raise water table.

CHAPTER – 05

SUCCESSFUL SOCIO-ECONOMIC SYSTEMS!

JAPANESE INDUSTRIAL SOCIETY:

After World War II, Japan completely destroyed. War did not destroy their noble qualities such as honor, patriotism, self-respect, self-sacrifice and devotion for work. Japanese Emperor not charged and tried for war crimes for starting World War II, since patriotic Japanese politicians and generals committed suicide rather than betraying their Emperor for their own survival. As a result, Japanese still continue ancient monarchy. Americans realized that any attempt to arrest Emperor will lead to guerilla war against occupying American army. But in Italy Mussolini publicly hanged and in Germany people tried for Nazi crimes. Honorable qualities of Japanese people polarized during American occupation of Japan. Japanese people united for their survival against occupation. They are not permitted to have a powerful defense forces or to produce lethal weapons. Afro-Asian countries live by exporting their natural resources such as mineral, oil, coal, diamond, gold, silver, copper, uranium, nickel, timber and other valuable items. Japanese did not possess such industrial raw materials but established powerful Industrial society. Japanese richer nation by organizing an industrial society carried out following activities:1. Raw materials imports through established purchase centers.2. Processed in factories into finished products by most advanced technology and exports a part of them by organized network of sales centers. They concentrated attention on most harmless products such as cameras, videos, television, musical instruments, radio receiver, stereoscope sets, motor cycles and automobiles. They turned out to be lovable items of modern industrial society which makes Japan one of the richest countries. These achieved by Japanese labor ministries planned social change to combat capitalist oligarchy of USA. Democratic organization of Japanese Corporations people-oriented management with involvement of all employees on basis of equality in a spirit of a united family enterprise. Employees committed to automation, productivity improvement, technological advancement, continuous education and training. Management by repeated investments in development of equipment and in educating and training its employees to use them devoted for welfare of its employees. United efforts of workers and employer only created wealth and wellbeing.

Japanese social system combines traditional Japanese culture with required organization to build industrial society by polarization of thoughts, efforts, skill and technology of many individuals to achieve collective superhuman power to break capitalist oligarchy forces. Japanese Corporations offer life time employment and bottom-up management; emphasize importance of group over individual. When

Japanese join a corporation make life time commitment, which corporation reciprocates. Harmonious productive and creative group developed through a life-long process of training, education, collective innovation through group effort. Workers organized into small groups. These groups directed by intellectuals and experts to pinned areas for development with many alternative courses of action. They leave choice of innovation and pride of achievement to Japanese work force. Decisions made during long period of discussions and modifications. They make consensus decisions and implemented harmoniously. Invariably most of changes initiated by workers. Swedish society and Japanese societies have succeeded in raising dignity of individual and total human dignity of nation. In Japan dignity dispersed with every Japanese citizen while in USA concentrated on a few. Total dignity of Japanese people remarkably higher than USA.

Feminist socialist joint families apply these Japanese work culture. Every member a lifelong employee of family enterprise. Family asset an indivisible asset of corporation. Apply management systems of Japanese to eradicate poverty and to survive as a socialistic joint family in industrial age. Traditions and cultures can be retained by an Industrial Society. One of admirable qualities of Japanese, ability to withhold family structure while in Western society family traditions broken down. People became individuals and lost respect and love for family members. This reflected in social life. Workers care more for personal gains and do not believe in devotion and sacrifice to industries. This resulted in retarding growth rate of industries. As a result, Japanese industries over took most of technologies of western world even though Japanese are short little people compared to European who are well built individuals with relatively high intelligence. Japan did not lose its cultures and traditions and at the same time it became an industrialized society while Western society lost its social identity when become industrialized. Western society paid a very high price for its industrialization. Study of Japanese industrial society shows that it is possible to retain ones inherited age old cultures and traditions when transforming an agricultural traditional society in to industrial society. 130 million Japanese live in over-crowded islands in Japanese peninsula. It is one of the greatest wonders. As Japanese live in a network of islands; it is easy to dispose their wastes in sea water. For them sea provides unlimited amount of sea food and other resources to help their survival. Japanese ecology is not damaged by over population and industrialization. It is possible for India to retain its age-old good cultures and ecology even after industrialized. Japanese people have more patriotism like the Germans. They have excellent quality to work together as a group. Success of modern societies bases on capacity to unite brains of different people and make them polarize their thoughts, skills, and effort like a laser beam. They shall be able to add skills of people one over the other to attain the superhuman skills. In this field Japanese greatest of living beings. In Industrial research collective effort important necessity. At present Japanese can only do it. Super human effort a new terminology decides how multiple human effort linked

together to make it as a super human power. Jewish people have proved on two occasions how they can work as a super human group. Examples are rescuing of Israelite plane from Entebbe airport and other is bombing of Iraqi atomic reactor. Salient features of Japanese Society 1. Retains family structure of society. Traditions and ecology retained intact. 2. Japanese working for one industry devoted all their life for its development. They show their patriotism, love, respect, devotion and sacrifice for development of their industry. For them honorable act. Study of Japanese industrial society shows that possible to retain ones inherited age old cultures and traditions when transforming an agricultural traditional society in to industrial society.

JEWISH KIBBUTZ INDUSTRIAL SOCIETIES (TRANSIENT SYSTEM):

Jewish people in past forced to desert their native land of Israel due to many reasons. One of them emergence of mighty Islamic empires of the Arabs and Turks. As because they belonged to a minority religion forced to lead a nomadic life. They travelled as a community of merchants, money lenders, doctors and scientists. During long wandering inquired enormous knowledge, wealth, and experience for survival. After World War II, circumstances compelled them to return back to native land. During arrival it was a desert without industry to provide jobs to new settlers. There was not adequate water for irrigation and for municipal uses. Natural climate was not conducive to human inhabitation. But intelligent settlers inventive, creative and hardworking establish powerful Jewish nation. Jewish people rushed to build dreamed Jewish nation. People needed shelter, food, clothing, medical care and work to keep them busy. These settlers formed small societies called Kibbutz to provide full employment for any number of people at short notices. It provides an opportunity for people to share their experience and talents. It provides a place to apply BRAIN STORMING TECHNIQUES to get new ideas and methods for development of industry in that area. Kibbutz provided an opportunity for every-one to participate in building new Israel. Kibbutz pooled all their human resources under one roof. They received financial assistance from Jewish communities living abroad. They all worked together and shared profits. Kibbutz can industrialize a community with minimum capital in a short period without losing one's traditions and culture. They tried to produce their own food from available land applying advanced techniques. They from the services of the available man power built their own settlements with housing, hospitals, handicraft center, workshops, industries, etc. This can be called the subsistence sector of Israel. When new industries built, people left Kibbutz to start independent life. Kibbutz provide opportunity for new settlers to acclimatize and adopt to new land. It provides incubation time for individuals to develop as members of Israel to create a place for their talents, abilities and labor. Collective living provides an opportunity for members to learn from each other and to utilize individual talents and skills for industrialization. 2. Collective kitchen helps to reduce cooking time by installation of modern kitchen machinery and equipment.3. Opportunity provides to start new enterprises at

lowest investments. Risk of individuals much lower and faster industrialization is possible.4. It provides social security, education and professional training essential for industrialization. 5. Modern accounting system and management provides to control group by following industrial engineering, industrial management, industrial administration, industrial psychology and statistical techniques.

CHINESE COMMUNIST INDUSTRIAL SOCIETY:

Chinese stopped population growth of China and developed super economic-military power. Developed administrative and technological methods to control population growth of China where birth of a male child considered pride of family. Land area of China four times of India but India and China will have same population in year 2022. China's notable achievements, eradicated poverty, communicable diseases, illiteracy, bad sanitation and backwardness from Chinese people. General health standards improvement helped China to start materialistic society. Maximum 'Single Child Law (SCL)' improved ecology of China. In China 30% of population live in villages while in India 70% live-in villages.

WEST GERMAN CONTRIBUTION TO MANKIND:

After second world war Germany totally destroyed but spirit of German people and their skills could not be conquered by victorious powers. German workers worked hard for low salaries to German companies and built up a powerful industrial complex in Europe. Villages and cities built in a very short period. Village houses look alike. Doors and windows are factory made. Houses built with industrial techniques and provide better housing than British. They welcomed and accepted all German origin people living all over backward parts of Europe. German people patriotism, discipline, technological skill, inventions and hard work notable contribution to human society. Germans desire to be hospitable to Germans.

ISLAM IF REFORMED REESTABLISH ITS POWER!

Islamic Ottoman Empire ruled Euro-Asia for 700 longer years while mighty CE empires lasted only 200 years. Islam very powerful unifying force incorporates socialism, equitable distribution of wealth, shower Taj Mahal building super love on burke clad possessed wife make them bear children and strong social regulations on deserting female. In countries like Iraq Saddam Hussain succeeded to provide social justice and government without corrupt practices. Educational level and awareness rising very rapidly in Iran. These countries retained militant traditional society of Islamic world. Islam have spread from Middle East to West Asia, Central Asia, West Africa, South East Asia and in the east up to Philippine. Islam spread to more than half of the globe. As Muslims are kith and kin of all races; bear responsibility to protect mother earth from global warming destructions. Islam reform as feminist Islam to enforce Mao maximum SCL; Swedish 35 years motherhood; mother 4-hour job and others 6-hour job till depopulate to year 1950 population level. Convert 66% FCL as warm Rain Forest. Urbanize non-viable rural farmer youngster pairs to save rural ecology. In Afro-Asia one billion living in peace and prosperity by year 2100 better than eight billion fighting for living resources.

4	2	When Japanese join a corporation make life time commitment, which corporation reciprocates. Harmonious productive and creative group developed through a life-long process of training, education, collective innovation through group effort. In Japan dignity dispersed with every Japanese citizen while in USA concentrated on a few. Japanese working for one industry devoted all their life for its development by showing their patriotism, love, respect, devotion and sacrifice for development of their industry as honorable act.	Japanese Corporations offer bottom-up management; emphasize importance of group over individual. Workers organized into small groups. These groups directed by intellectuals and experts to pinned areas for development with many alternative courses of action. They leave choice of innovation and pride of achievement to Japanese work force. They make consensus decisions and implemented harmoniously.
5	2	Japanese Society retains family structure of society. Traditions and ecology retained intact. Study of Japanese industrial society shows that retaining ones inherited age old cultures and traditions possible.	Japanese became a rich nation by organizing an industrial society. Agricultural traditional society can transform in to a rich industrial society by following proven techniques.
6	2	Jews travelled as a community of merchants, money lenders, doctors and scientists. During long wandering inquired enormous knowledge, wealth, and experience for survival. Kibbutz provide full employment for any number of people at short notices. It provides an opportunity to apply brain storming techniques to get new ideas and methods for development of industry in that area.	Kibbutz provided an opportunity for every-one to participate in building new Israel. Kibbutz pooled all their human resources under one roof. They received financial assistance from Jewish communities living abroad. They by collective effort built industrial society in a desert without water and good climate. Developed JDIT for humanity.
7	2	Land area of China four times of India but India and China will have same population in year 2022. China's notable achievements, eradicated poverty, communicable diseases, illiteracy, bad sanitation and backwardness from Chinese people. General health standards improvement helped China to start materialistic society. Maximum 'Single Child Law (SCL)' improved ecology of China.	China developed administrative and technological methods to control population growth. In China 30% of population live in villages while in India 70% lives. By year 2020 AAL&M nations enforce Mao maximum SCL; Swedish 35-years mother-hood; mother 4-hours job and others 6-hours job to build an industrial society.
8	2	German people patriotism, discipline, technological skill, inventions and hard work notable. Germans desire to be hospitable enabled German people live honorably.	Germans welcomed and accepted all German origin people living all over backward parts of Europe. Receive back RSM&G from CEN.
9	2	Muslims are kith an of all races and bear responsibility to protect mother earth from global warming destructions. Urbanize non-viable farmers to save ecology.	By year 2020, Muslim reform Islam as feminist Islam and enforce maximum SCL, 35 years motherhood, mother 4-hour job and others 6-hour job.

CHAPTER – 06

DANGERS OF POPULATION EXPLOSION AND TECHNOLOGY!

DANGERS OF TECHNOLOGY:

European discovered hydraulic power from running waters of river; by burning fire wood or coal or oil in a furnace of engine, steam power generated; wind power generated from wind mills; from radio-active materials atomic power generated. From various sources of energy, operated power stations for industrialization of Europe. New technology developed trains, steam ships, planes and automobiles. Identified ores and minerals to extract metals, non-metals and construction materials. Invention of electricity, electrical machines, electronics and communications, electronic and control systems enlarged capacity of 'Christian European (CE)'. Machinery developed to produce thread and woven cloth. Animal power and human power replaced by mechanical arm of machines. Man became an operator and machines performed work. Research conducted in a massive scale to develop new technology to increase productivity hundred times more than traditional societies man. These discoveries coupled with application of gun powder for war strengthened hands of CE. CE with machinery and weapons transformed into a superior form of mankind with enormous power to destroy natural ecology which created him on this earth. Soon he started destroying nature by his scientific and technological advancement. Destructive weapons developed which can destroy whole Earth's capacity to support living beings on this earth. By reduction of death rate of underdeveloped 'Afro, Asian and Latino and Muslim (AAL&M)' nations continuously exploded populations them destroyed ecology of this Earth which provides ambient conditions to permit human inhabitation on this earth. Technological and scientific advancements destroyed natural ecological controls such as famine, epidemic diseases, viral diseases, small pox, plague, cholera, infant deaths and maternal mortality which controls population level. Capacity of human increased many folds like power of a bullock cart and a powerful goods train.

HOW TO MAKE SLAVE MORE PRODUCTIVE?

When American industries developed into an advanced level produced enormous quantity of machinery and equipment. Medicine and chemical industries needed more workers to work in the factories and more consumers to buy their product. If the slaves worked in farms, cannot sell their farm machines and house hold machinery. Slaves less educated, unskilled and non-cooperative. If he is fired from work will have to pay for his rent, food, clothing, medicine and pleasures. His purchases increase sales. American industrial society abolished slavery. Name for new slave is hourly workers. American labor hired and fired for hourly wages.

HOW TO MAKE COLONIES MORE PROFITABLE?

Colonies did not bring adequate profit since it required a large military force to control colonies. Compared with income from these colonies; cost of maintenance of military forces more expensive. In Algeria French fought for seven years and could not stop freedom struggle. Finally, French accepted defeat and gave freedom. Colonies management did not increase productivity and economy of colony. They realized that if they are made free countries, may develop fast and economy become stronger. Once economy stronger will import enormous quantity of industrial products. They did not anticipate the colonies will explode and destroy the global ecology by destroying warm 'Rain Forest (RF)' contained by 30 degrees north and south of Ecuador that covers 43% of global critical area! They believed they will never be able to catch up with technological advancement of colonial governments. Colonialists created lots of border disputes in newly independent countries. Spanish colonies in South America got their freedom by declaring war with Spanish King. This resulted in lots of war and industrialized countries exported lots of weapons and ammunition to them. Newly independent countries fought amongst themselves but did not become dependent on colonialists since 'East Asian Nations (EAN)' and Communist nations supported former colonies. Colonies became dependent for weapons and weapon technology. They longed for their cloths and consumer goods. Became addicted to their brands of soft drinks, alcoholic drinks and other eatables. They became dependent on luxury goods such as cars, motorcycles, videos, stereos, cameras, perfumes, jewels and so on. One of the major attractions a Swiss bank number account to hide their black money. Even though colonies freed they became more dependent on industrial countries for their day to day life. They sold all their mineral wealth, forest wealth, oars, and natural resources without any consideration for future needs. People of third world became greedy, avaricious and prepared to do any damage to country or country men to enjoy materialistic luxuries. Industrial world used prostitutes, money in Swiss bank accounts, drinks in night club, tours to sex centers, presents of automobile and jewels to trap important leaders who negotiated for third world benefitted industrial society compared to their gains during colonial periods.

INDUSTRIALIZED SOCIETIES UNHAPPY PEOPLE ON EARTH:

CE lost happiness of family life by overdriving sexual needs and destroyed human happiness. Animals do sex for procreation while industrial society exploits it for fun. As a result of erotic sex behavior, it made a significant population sterile. Family structure destroyed. Population growth became negative. Large percentage of children brought up by divorced parents. Old people live in loneliness in old age homes where medical technology prolong boring life. Old people don't enjoy second childhood in company of a family home. Continue to live in loneliness and wait for death. It is terrible to be old and lonely. European taught methods of increasing population and trained other people of earth to destroy ecology. This vast modern human population turned out to be greatest and deadliest parasite of this earth

ecology. Industrial wastes, exhaust of transporting machines, wastes of townships and human excrement combinedly threaten ecological balance on this earth. If ecological damages continued can cause irreparable damages to life of our descendants. Traditional society had lesser materialistic affluence but had a good family life. They had a simple society and possessed more human characters. Industrial society destroyed human values of traditional societies by its material luxury. Ecological damages of modern family higher than grandfather generation and consumes more energy per head for farming, transport and for living amenity.

ECO-DESTRUCTIONS OF ROMAN EMPIRE:

During Roman period large numbers of trees cut down for use of Roman Empire from North African countries of Tunisia and Morocco nearer to Europe. Forest in these countries destroyed and converted into farming lands to supply food to Roman capital. In course of time dessert spread in Tunisia and Morocco of North Africa. Dr. Lalitha Kabilan have been to Iraq and saw two great mighty river Euphrates and Tigris flow through this country. They created during olden days Mesopotamian civilization the first human society to form canal irrigation systems for cultivation. As a result of quick raise of population; people cut down all available plants and trees for cooking fire damaged natural forest. As time passed became a vast desert. Ruins of Babylon stand as a monument to ecological damages of Iraq.

EXPLODED AAL&M NATIONS CREATED GLOBAL WARMING:

Due to formation of industrial society world population crossed five billion mark in year 1989. Out of five billion inhabitants of this earth CE; the super human only 25%.By year 2100 the super human 'Christian European (CE)' reduce to 7.4% of global population but AAL&M nations explode to 78.6% and cause global warming destruction of ecology and harmony. One billion population of Mother Earth explodes to 11 billion in year 2100 result in unlimited quantities of carbon dioxide and other oxide gases emission converted into acid rain kills forests. Gases in atmosphere during day time reduce reflection of sunlight from earth. Atmospheric temperature raises by 1.5 degree centigrade in year 2030; drastically affect counties like India and Siberia. Population explosion increase garbage which pollutes surroundings. India create human misery by following 1. Destruction of natural vegetations on earth which protects life.2. Changing natural balance in quantity of forest, vegetation, species of animals, birds, insects, and other living organisms naturally existed in India.3. Polluting wealth of nature such as drinking water, breathing atmospheric air and all that support mankind in this earth. 4. Indiscriminate exploitation of mineral and fuel reserves of this earth which is needed for future generations in this world will result in creating unlimited problems for future generation.5. Many noticeable seasonal changes are taking place in India. The ancient India had enormous forest and they had excellent rainfall. Indian rainfall distributed throughout the year while maximum rainfall occurred during monsoon

seasons. Due to deforestation and due to the green-house effect seasonal rainfalls becoming irregular. 6. Recently a seasonal failure caused a rainless period of seven months at a stretch. They are all damages to the Earth's condition which preserve life on this planet. Some of them can be directly identified by lay man and many other may take longer periods than our life span to observe them. We wish life span of the mankind be unlimited.

<p>1</p>	<p>3 Earth occupied by one billion people for millions of years controlled by natural birth and death of 40 per year per 1000 populations. CE superior form of mankind with enormous technological and scientific advancements destroyed natural ecological controls such as famine, epidemic diseases, viral diseases, small pox, plague, cholera, infant deaths and maternal mortality which controlled population level of Hindus and Muslims. CE reduced death rate of underdeveloped 'Afro, Asian and Latino and Muslim (AAL&M)' 109 nations inhabiting and they continuously exploded.</p>	<p>Reducing death rate increased human destructive power many folds. Due to CE formation of industrial society world population had crossed the five billion mark in the year 1989. Out of five billion inhabitants of this earth CE super human only 25%. By year 2100 the super human will reduce to 7.4% of global population but AAL&M nations explode to 78.6 % and cause global warming destruction of ecology and harmony in 43% of global warm forest critical area. CE take up his responsibility to depopulate AAL&M 109 nations to year 1950 level before year 2100.</p>
<p>2</p>	<p>Former colonies dependent for weapons and longed for their cloths and cosmetics. Became addicted to soft drinks, alcoholic drinks and on Swiss bank number account for black money. Mesopotamian civilization first to form canal irrigation systems for cultivation caused quick raise of population and people denuded 'Rain Forest (RF)' and damaged natural ecology. As time passed became a vast desert. Babylon stand as a monument to ecological damages.</p>	<p>Human turned out to be greatest and deadliest parasite of this earth ecology. Industrial wastes, exhaust of transporting machines, wastes of townships and human excrement combinedly threaten inhabiting population's life on this planet. Many of them cannot be directly identified by lay man take longer periods than life span. Newly independent countries India and Pakistan fought amongst themselves and become dependent on colonialists.</p>

CHAPTER – 07

STUDY OF CONSTRUCTED HUMAN SOCIETIES OF THE WORLD!

PETER BERGER SOCIOLOGY:

Subconscious mind stored up programs in our earlier brains on intuitive and logical deductions, traditions, customs, manners and knowledge of our societies are not accessible to that degree to which stored data of our big-brains. Mankind instincts had withered away but developed a more complex social order to protect himself. Those protectionist techniques turned out to be very personal and selfish. Emperors wanted their children to inherit their kingdom. Prime Ministers created-vested interests to enable their children to be elected as Prime Ministers. Land owners wanted their children to inherit their lands. Industrialists wanted only their heirs to acquire the share in their industries. As a result, class structure became very rigid and made life difficult for people who did not have family back ground. Berger believes that society is socially constructed and society could be reconstructed. Invention of printing press in 15th century in Europe accelerated spread of science and technological inventions amongst European. Catholic Church threatened by new discoveries which contradicted biblical views. Church persecuted eminent scientist Galileo, who discovered that earth globe and not flat brick. This new idea motivated many adventurers to circumnavigate globe which led to establish a global European Empire. Discovery of new continents led to colonization of major traditional and tribal societies; and large number of able-bodied black people enslaved. Major hunting societies of American continent, Australia and others exterminated. Colonization, extermination of hunting societies and slavery considered good form of social order. Later Abraham Lincoln realized that slavery bad social order and he abolished it. Mahatma Gandhi suffered under laws of segregation in South Africa and so, he opposed untouchability. European devoted much time for education and learned techniques for acquiring new material, wealth and pleasures. French writers caused French Revolution and brought about democracy which in later history spread to the whole world. Karl Marx communist manifesto enabled spread of communism. Swedish economist Professor Knut Wicksel wished to create new model society in Sweden. He persuaded his government to enforce a heavy inheritance tax so that Swedish children could start their life in equal footing in Sweden.

FORMATION OF TECHNICIZED INDUSTRIAL SOCIETY:

Isaak A Lulu the famous French sociologist studied the Technicized industrial society. Following caused formation of Industrial society in Europe. Invention of printing press in 15th century enabled collection and transfer of scientific, technical and social literature amongst intellectuals and public of Europe. New ideas and inventions spread amongst 'Christian European (CE)' and caused chain reaction of scientific, technological and social development. By the end of 18th century CE

Email: rkabilan1944 @
gmail.com

Visit: www.lalithakabilan.com

became mightiest society in the world. CE conquered and made rest of world as a market for industrial goods. Colonization solved marketing problem and allowed free growth of industries. This resulted in accumulation of wealth and knowledge. Population exploded due to advent of medical technology. This further increased life expectation which enabled survival of highly skilled workers and professional people. As a result, whole society began to be dominated by ideas and inventions. Protestantism enabled free thinking and revolution. French Revolution created a new democratic form of government which in later years became model society to rest of the world. Inventions and capital accumulation led to industrialization. New class of non-land-owning gentry created in urban areas who offered jobs to poor unemployed rural people. They paid higher wages than traditional farming and handicraft. Landed gentry slowly became inferior to urban gentry. People with new ideas and skills created wealth in an unprecedented scale compared to agriculture. They created new commodities and services which become new necessity of new society. Capital accumulated since CE and their children toiled long hours in their primitive factories and mines for their survival.

PROCESS INVOLVED IN DEVELOPMENT OF SOCIETY:

Berger says that if a group of people can repeat certain habits, it leads to habitualisation. One example is adoption of Toyota system of production by Japanese export companies. This created Technicism to over-run industrial might of big capitalist corporate powers. Three stages in social development of an individual are, Externalization is creating rules and regulations. Objectification repeat the process. Internalization all rules become second nature. Phenomenology is a scientific method of studying society. Observer detaches himself from event and observes objectively. He observes every-day life of people such as routines, work, leisure, entertainment and other activities. Primary socialization attained during childhood and secondary socialization after childhood. During this period a child shaped emotionally and culturally. Following are some of examples of people coming to new awareness of freedom of choice if they think that society creates rules to them. A girl born in a prostituting family has to begin her profession at 16 and if she questions her role and refuse to follow or a boy born in a doctor's family would not become a doctor and would prefer music or sports or a girl would not like to be married and become a mother or a member of a cannibal society refuse to kill and eat a stranger among his people. These people refuse to play roles and become deviant people to their society.

EUROPEAN INDUSTRIAL SOCIETY:

Europe underwent a series of religious revolutions. European religions of Greeks, Romans, Swedes and other European disappeared since converted into Christianity. They have built churches and learned Greek and Latin to follow bible. This enabled a common linguistic media for transmission of information amongst them. Catholic churches led by celibate literate priests. They educated people to read bible and trained them to hear their sermons patiently and to attend their

mass ceremony unquestioningly. These repetitions inculcated routines in the culture of European. Literacy opened communication with other European. Initially Greek and Latin medium of instruction in European Universities. Very well-organized European Universities communicated scientific literature amongst all intellectuals. Catholic church enforced a strong biblical control on its society. Scientist Galileo punished for discovering earth globe instead of a brick. All writings censored. All social groups controlled. But suddenly Protestantism erupted in Europe. Britain, Germany and Sweden became protestants. Suddenly biblical moral and ethical values of European society collapsed. Intellectuals and scientists pursued research in an enormous scale. Great adventurers circumnavigated globe and established sea routes. 'Christian European(CE)' built Navy to conquer rest of the world. European techniques expanded in geometric progression and society became dynamic and created a vast European Empire on this earth contrary to other world societies.

CAPITALISTIC DEMOCRACY:

Marshall's economic theories created a capital dominated economy. In democratic countries power concentrated with multinational corporations which had adequate public relations to manipulate governments, as a result, common man lost power. He had right to cast his ballot. Under capitalist funded democracy state controlled by propaganda. Propaganda standardized thinking, behavior and belief of every individual. Justice given away to laws. Lawyers proliferated laws and they did not fight for philosophical reasons. Under capitalism morality lost and ethics absorbed. Propaganda techniques control human mind and public opinion. Public opinion destroyed individual originality. Opportunity created in industrial society for any-one to find a source of income and security to live without family elders or spouse enabled atomization of society which killed traditional values.

COMMUNIST REVOLUTIONS AND MARSHALL TECHNICISM:

Karl Marx communist manifesto created violent revolutions in Europe and communist governments formed. Communism became a dominant force and opposed capitalistic countries. These Communist countries concentrated power in the hands of few in party they were not competent enough to replace industrialist who managed industries. They did not have adequate managerial technique. Communist and capitalist countries engaged in an arms race? European communists could not succeed in their effort to bring about an idealistic communist society with surplus consumer goods like China. After world war II, German and Japanese societies manipulated by occupational forces. Highly patriotic and nationalistic societies of these two countries concentrated all their attention to establish a powerful Technicized society in their land to protect their sovereignty and independence. These two countries are having golden era of their history. They have welfare governments. Japanese companies offer life time employment. In these countries Marshall's economic theories are modified to incorporate technique as the fifth factor of production This led to the creation of Marshall Technicism.

TECHNICAL SOCIETY:

Technique best way of doing things and it transforms everything into a mechanical activity. Machines are heart of technique. Essence of machines are mechanization. Application of technique to do anything in most systematic way, step by step to avoid mistake is rationalization. Technology leads to unemployment and when unemployed retrained to new jobs problem solved. When science united with technique becomes technology. When human behavior and technique are combined it leads to standardization of behavior or one dimensionality. When technique is applied to all human activity to find out the best method of doing it, results in technical phenomenon. This is also a quest for the best way of doing things. Choice among means is no longer subjective or ethical or moral or religious but merely objective. When technique is applied to life it is no more leisure, conversation, dance, singing, festival and linguistic merit. Clock becomes controller of life. Every event is to be planned and man becomes a robot. When technique is applied to education it became a means to learn technique. More technique you know more educated you became. When technique applied to work it is no more the art of man but divided into elements of work. Division and specialization techniques created mass-production. Individual less and less important and man dispensable. Equipment and machines permanent assets and workers hired and fired. Value of a worker nothing but his hiring, firing and training cost. Japanese worker capable of mastering a machine in three days. So, value of an industrial worker his three days wages.

INHUMAN TECHNICIZED SOCIETY:

Transformation of traditional society into capitalistic funded democracy destroyed values, traditions, family structure and others. Government will not intervene to protect citizens from evils of technicization. Mass media treat population as a herd of sheep. Media shape ambitions, goal, desires and life styles by their manipulations. Propaganda makes certain principles unquestionable. Modern package tours are an example of modern amusement. Ruling people exploit population to fulfill ambition of few in power. Wealth accumulated with few corporations and major population become workers. Large scale urbanization created large scale slum dwelling. It created prostitution and immorality. Trade in narcotic and drugs prevailed.

JAPANESE RECONSTRUCT SOCIETY:

During era of Japanese emperor Meiji (1865-1912), Japanese society reconstructed by eliminating class differences and privileges by applying European ideas. All Japanese made equal before law and bureaucrats directed different sections of society to full fill different national obligations to build an industrial society to defend from dangers of European society. It asked farmers to pay tax and farmer sons to become conscript soldiers for war. Employers constructed mines and built industries for foreign trade. Samurai as ministers gave instructions on behalf of 16 years old Emperor and transformed Japan as industrial power. Samurai class

which collected tax and carried Sword gave up its privilege and became a common citizen and gave directions on how to build new society. Japanese built railways within 15 years period after seeing a model of toy train engine. During a short period of 40 years, Japanese learned all industrial skills which Europeans took to learn in 175 years. In short time Japan had one million soldiers and defeated Russia in Manchuria and humiliated China.

INDIA PROVED SOCIETY COULD BE RECONSTRUCTED:

Human ideas come from brain waves. Once an idea comes to a mind dominates thoughts. It grows and develops better forms and finally forces a person to action. It is possible for intellectuals to find superior systems more conducive to human society. Sufferings of Gandhi under segregating regime in South Africa motivated him to fight against Hindus segregating system in his native land India where it existed for thousands of years. Because a system continued for a longtime cannot conclude that it is time proven. India became a multi-lingual democratic socialistic nation. Indian government applied techniques successfully to increase food production, spread education and enforced social regulations with help of bureaucracy proved society could be socially constructed. Two Tamils brothers worked as coolly gangue leaders in SriLankan tea estates; assisted as picker boys in tennis club for CE employers; after earning enough, returned to Paravai in Madurai in TamilNadu. They built mansion house; married beautiful brides. Their offspring and descendants 60 numbers and one of them Dr. Lalitha Kabilan with Swedish Ph.D. in immunology and member of New York Academy of Sciences; worked in malaria and dengue vaccine research for Indian Council for Medical Research. Serving CE as coolly helped Tamils to settle in 87 countries of the world.

5	3	Swedish Professor Knut Wicksel persuaded Swedish government to enforce a heavy inheritance tax so that all Swedish children could start their life in equal footing in Sweden.	From arms purchase commissions Politicians-built dynastic rule and built vote banks by subsidy to retain political power.
6	3	Samurai class which collected tax and carried Sword gave up its privilege and became a common citizen and gave directions on how to build new society.	India can continue to apply Mao maximum SCL; Swedish 35-year motherhood; to reduce population to eradicate poverty and unemployment.
7	3	Japanese built railways within 15 years period after seeing a model of toy train engine. During a short period of 40 years, Japanese learned all industrial skills which European developed in 175 years. In short time Japan had one million soldiers and defeated Russia in Manchuria and humiliated China.	AAL&M nations can apply proven techniques of depopulation and technology building. Sex equality building techniques of Sweden; equality for employment and work for every one of China enforce by military and police.
8	3	European urban people with new ideas and skills created wealth in an unprecedented scale compared to agriculture. They created new commodities and services which become new necessity of new society. Capital accumulated since CE and their children toiled long hours in their primitive factories and mines for their survival.	Landed gentry slowly became inferior to urban gentry. Urbanize non-viable farm youngster inter-pairs in urban retires evicted homes converted as GDR to seek urban jobs. 80% population of SriLanka lives in Colombo city. Build RF by denying rights to farming that damages ecology.

3 9	Opportunity created in industrial society for any-one to find a source of income and build atomized society all over the world. European US Industrial society division and specialization techniques created mass-production. Individual less and less important and dispensable.	When technique is applied to life it is no more leisure, clock becomes controller of life. When technique is applied to education it became a means to learn technique. More technique you know more educated you became.
--------	--	---

CHAPTER -08

HOW TO COMPARE SOCIETIES?

HERBERT MARKUSE COMPARISON OF SOCIETY:

Compared to other species, human society has three characters which make it more complex. They are our sex behavior and lack of instinctive capacity to plan for future. The bull makes sex with cow just for procreation at optimum time but humans repeat this process for fun. Sex sold in market place as a commodity. Humans, only animate beings use procreative instinct for pleasure. This makes society complicated. Theft, robbery, cheating, domination, subjugation, invasion, colonization, exploitation, slavery, neo-colonization, favoritism, accumulation of wealth, collection of high interest rates, collection of higher rents, dictatorship and many other evil practices create human social problems. Decolonization freed many nations from exploitation. Abolition of slavery created workers dependent on employment opportunities. Modern industrial society believes that war would create employment opportunity to its people and benefit their nation. They think that killing other nationality by advanced weapons and protecting their population leads to making of great social order. This leads to law of might is right. The newly independent nations are applying democratic forms of government in which 51% of the people subjugate rest of 49% of minority population. They stop water flowing to other states; damage their life existence by damaging their economy. So, nations may exploit its minority people. Dictators or groups may exploit their national wealth or their citizens. Humans use evil practices to have advantage over fellow citizens or nations. Questions asked what makes human life worth living? What motivates us to struggle to extend our life for longer period? What social activities lead to bad society? What are human characters that lead to creation of bad society? What kind of political activity creates bad society? What kind of economic activity leads to bad society? What kind of cultural behavior leads to bad social order? What kind of moral values leads to bad society? What builds great nations?

CAPITALISM AND TECHNOLOGY EXPLOIT POPULATIONS:

Mechanisms can simulate human action (robots). Machines involve mechanisms. Machines stored-up power of man. A group of machines, robots and assembly lines becomes a technological base. If they could be operated by hiring people, enormous amount of wealth would be created. The power station is the accumulation of human effort to convert energy from different sources such as streams, water falls, dams, coal, natural gas, sea waves, wind, hot springs, sunlight and oil. If people are employed to run the power station enormous energy could be produced. If few persons would control all such resources then creates power concentration. If people own banks, news media, retail shops, factories they can

manipulate people to buy what they produce. Modern media can create new needs amongst citizens and manipulate people's thinking, cultural behavior and opinion. As a result, it will not be possible for people to revolt against technology which has woven a net over them. Their present way of living and luxuries will weaken their mind. This will lead to their slavery and subjugation to the present system. In the society of nations, some nations are exploited by some other nations. Combination of Technology and capitalism exploit population.

WELFARE GOVERNMENT USE TECHNOLOGY FOR BETTERMENT:

Many welfare governments managed by technical administrators apply technology to improve well-being of population. Technological exploitations of people controlled. Planning applied to produce and supply actually needed by society. TV & Radio as mediums of communication controlled by state to educate population and to protect from technological exploitation. They censor sensational news, advertising related to goods and services which may cause health or moral degradation. Trade in alcoholic drinks, betting, gambling and racing nationalized. Power generation kept under control of government. Transportation, communication, education, health services controlled by state. Plato wanted ideal society all man to have the means to live and ability to philosophy. This means that every man shall have opportunity to educate himself and have a means of earning his livelihood. This applies to Sweden. In Sweden one finds opportunity to earn living, take-up education and become a scholar. Freedom from toil is better than toil. Children study subject of their choice and parents shall not direct children to do what they have failed to achieve. Then children have enormous freedom of choice. Absence of unemployment and free choice of acquiring any desired trade makes life free. Lack of appreciable difference in take home pay and capability of any individual to buy any consumer item creates equality among its citizens. Same standards of food and housing creates an ambient living atmosphere.

CHILDREN START LIFE AS EQUALS:

How to liberate slave from negative thinking that slavery is better than freedom. Liberate from slave consciousness, slave imagination and slavish obedience. Human encourages to achieve equality. Eliminate garbage, unnecessary needs, industrial pollutions, poisonous chemical which we spray on our fields and plantations and in water fields. Every generation accumulated wealth surrender to the nation as our inheritor. All children start life on equal footing in nation. Evils in society accumulation of wealth and power in bad hands. Society control all evil practices of man by legal means. Conscious reaction of people come from ethical and moral values.

40	The bull makes sex with cow just for procreation at optimum time but humans repeat this process for fun. Sex sold in market place as a commodity. Humans, only animate beings use	Modern industrial society believes that war would create employment opportunity to its people and benefit their nation. They think that killing other nationality by advanced weapons and

They censor advertising related to goods and services which may cause health or moral degradation. Trade in alcoholic drinks, betting, gambling and racing nationalized. Transportation, communication, education, health services controlled by state.</p>
3	<p>4 Children study subject of their choice and parents not direct children to do what they have failed to achieve. Then are enormous freedom of choice for everyone. Every generation leave accumulated wealth to nation as our inheritor.</p>	<p>By year 2020, conscious reaction of people come from ethical and moral values. Society control all evil practices of man by legal means. Accumulation of wealth and power in bad hands leads to evilness controls.</p>

CHAPTER 09

GROUP STUDIES OF SABAPATHY THEVER KITH AND KIN IN PERIYAKOTTAI VILLAGE!

GROUP STUDY OF GRANDFATHERSABAPATHY

THEVER GENERATION KITH AND KIN IN YEAR 1890

Husband	Wives	Sons	Daughters	Total
10	10	7	12	39

Grandfather was one of the sons in his group and grandmother one of the wife's. Compared to then period national average of 22 years lifespan; grandfather clan above 75 years. They were well built individuals and their average height for men was 175 centimeters and for woman 160 centimeters. There was no poverty in any of those families. Grandfather generation used kerosene for lighting lanterns. Animal power used for farming and transportation. Up to year 1920, Indians led traditional life pattern. Woman conceived and delivered children to rear working population. Child assisted parents from age of ten. Village had a big forest on the western side and people passed through forest path infested with robbers to Madukkur town. Southern Mangulam pond collected rain water runoff from western forest with mango trees, jackfruit trees, coconut trees, casuarina trees etc. Sheds for their sheep maintained near fringe of forest. Village lake located on north east and northern side of village. This lake received water supply from three sources. Cauvery water, runoff from local rains and Kannanar river water. River Kannanar runs on northern side and then turns to southern side. River water for irrigation tapped in its up streams at a distance of four kilometers and then branched off into a long river shaped lake with a flood out let on its tail end. Between river and lake formed a very fertile plains where paddy grown. In middle of plains 21 kilometers canal runs ending at Thambikkottai village. This canal created direct link with Kannanar river with a sluice and served as drainage canal for Periyakottai lake. About 5-kilometer-long river shaped lake had huge embankment with special plantation of trees with long network of roots bound soil of earthen embankment. Forest on embankment was very dense, Many ponds dug for irrigation of village to store rain water for off seasons. Traditional Nat Tamai managed village irrigation systems, temples and judiciary. The land tax collected by village headman and paid into taluk treasury.

Grandfather Sabapathy the village head man was expert fisherman fished for his daily needs; reared cattle and milked cows. He abolished evil practices of slaughtering goats and cocks as offering to God to please him and to get his favors. As he advocated non-violence; he himself stopped killing birds, fishes and other lives for his food or for his safety. His whole family became vegetarians. Two men accompanied him for shepherding his cattle to grassland. He also accepted his cousins flocks of cattle to join his cattle to grassland. He led cattle by walking in front of them led to correct pasture land, while his companions-controlled cattle. When he was going along offered broken rise grains to ant hills for feeding ants. On one occasion a big cobra a deadly poisonous snake, fell into house well. Then he sent for snake catcher to catch it alive and taken to forest to live in jungles. He strongly believed that every living being had right to live in earth like the human.

He was village head man and was responsible for tax collections. He participated in freedom struggle and followed non-cooperation movement against British. Devotion to social reforms and participation in freedom struggle weakened economic conditions and became poor. Grandmother was interested in economic welfare of family. She followed his rules by strictly following vegetarianism. Stopped talking to him since could not forgive for not supporting children's educational program. Land holding of this group during grandfather's generation was 150 acres. Paternal clan living at that period maintained same standards. Land tax of British administration was higher and farmers became poorer. His dear most cattle sent to his wife's village for fear of confiscation by tax collectors. Many died since not used to saline water.

GRANDFATHER SON GENERATION YEAR 1920 :

Husband	Wives	Sons	Daughters	Total
11	11	13	7	31+11*

*emigrated

My father was one son in grandfather son generation. One family of 11 members out of grandfather generation sold lands, homes and migrated to next village. The land holding of clan during this generation was 125 acres. In year 1935, Mettur dam irrigation system canals extended to this area. Minor canal passed through south western side of village .It irrigated western side of village and lake irrigation system. As a result, water supply abundant for paddy cultivation. A large number of immigrant workers attracted by our farms. After my eldest uncle passed his school final examination with merit, could not go for higher education. Eldest uncle a revolutionary took to social work by foregoing government service. He advocated peace and settled all disputes by discussions. Violence removed from village and spread peaceful coexistence and surrendered traditional rights to make villagers as equals.

Eldest uncle persuaded district administration to plan new road to pass

Email: rkabilan1944 @
gmail.com

Visit: www.lalithakabilan.com

through our village. 1945-year troubled period and development minimal. Group rivalry eliminated. India received independence during my father's generation. I was three years old and literacy level was very low. Under these circumstances adult franchise democratic society enforced by British. Congress Party nominated local Zamindar or big land owners who had influence with people since they had adequate finance to cover electioneering expenses and to maintain political expenses as candidates. Land reform laws limit land holding of individuals and joint families. Tenant welfare acts and bonded labor protection acts introduced.

Eldest uncle followed Gandhi's sex avoidance to reduce birth rate to a single child. He was socialist and believed in **From every one according to his abilities and to every one according to his needs'**. He was a man of character and had a lovable personality. He moved in higher circles of Congress Party. His simplicity, honesty and unselfish service to society brought him respectability. He did not follow traditional partitions method of dividing family after death of their father but divided task between three brothers and mother. This new method of division and specialization created enormous development in socialistic joint family economy. He chose political life as his field of interest; built primary school but sent family children to town school for rapid urbanization. He started cooperative societies and built a colony for landless workers by donating his land. As a member of congress party built up basic democratic set up for socialistic India. Second elder uncle in his life time carried out enormous cattle powered farm work and extracted more work from his cattle, fellow companions and employees. I observed his management techniques and worked along with him for many days. His association gave me chances for learning management of employees and project administration. He managed family farming completely and was a specialist. He belonged to class of farmer who worked side by side with his employees; believed in hard work and agricultural production rose rapidly. He maintained finest working cattle and shepherded cattle during last period of his life. My father after working for a year in Jaffna trade, took to contract work for executing government construction for 'Public Works Department (PWD)'. He hired labors, masons, brick makers, reinforcement workers, shuttering workers and paid them charges for their work. He built canals, culverts, embankments, school building, bridges and roads.

SOCIALISTIC JOINT FAMILY EXPLODED POPULATION :

My father generation's children born after the year 1930 had modern hospital facilities. Children vaccinated against smallpox and cholera. Infant and maternal mortality rate low. A government hospital with modern Western medical facilities available at a distance of 15 kilometers of which 10 kilometers was covered by bus route. Even though I have caused a fatal injury in my chest at age of three, my life saved by taluk government hospital care. Increase in food production, prosperity and availability of medical facilities encouraged people to have more children. During grandmothers' active life period everything functioned well.

Grandfather and grandmother joint socialistic family started with 2 members increased to 27 members in year 1965. Eldest uncle family had 5 members, middle uncle family had 11 members and my father family had 11 members. Family with seven couples, many adult members and 4 children became enormous to be controlled by simple accounting systems. There were many financial transactions which could not be controlled by their simple accounting system. Some of notable transactions; borrowed a huge sum of money at enormous interest rate (118% per annum) for purchasing paddy fields. 2. Money borrowed for land development spent it in marriage functions. 3. Large sum of money invested in construction of a residential house and sold productive rice fields for this purpose. 4. One of family members was in charge of village land tax collection. This money mixed with family maintenance funds. 5. My father undertook a big construction of a bridge which required a lot of working capital. Bigger confusion and mistrust created amongst family members. Children grew up and became adults and living standards of educated increased. Return from farming shrank continuously and people did not notice it. Gradual reduction in supply of irrigation water originally thought to be effect of seasonal fluctuations in rainfall found to be due to construction of water dam in upper reaches of river Cauvery. By year 1965 death reduced to 19, birth was 41 and new job required 22 per 1000 population per year. Farming required diesel, petrol and other industrial inputs. Profit margins shrank and PL 480 food-aide dumped imported food grains, milk powder, pulses etc. Net income of farmers to live shrank day by day. Farmers were not any more self-sustaining. 'Rate Of Return (ROI)' in farming fell below bank interest rates.

members. I am a husband in this group. Death 15, birth 37, new jobs required 22 per 1000 population per year. Average per capita land holding of my son's generation 1.1 acre which is insufficient to run viable independent farm. Profit margin for cultivation of corn and other grains less than Rs.600 per acre of land per crop. Paddy cultivation yielded Rs. 900 per acre of land per crop. A good coconut garden yielded Rs. 6,000 per acre of land per year. So, during my stay I concentrated on developing coconut farming. But that took a long period to yield good results. As Cauvery water diminished; farm requires additional investment for bore wells and water saving techniques. Problems can be solved by depopulation by maximum SCL, Swedish 35-year motherhood; feminist socialistic joint family and urbanization of qualified adventurous youngsters. Now world population is expected to be 11195 million in the year 2100. In South America large masses of 80% of national populations live in few big cities. In SriLanka 80% of national population lives in Colombo city. By urbanization, environment and ecology of rural villages reconstruct to save from global warming destructions of humanity!

CHAPTER-10

WELFARE STATE USES TECHNIQUES FOR DEVELOPMENT!

Sweden applied technology for welfare of citizens and prevented technology exploit its citizen. Research applied to discover new technology to help farmers to improve their productivity. Patent right capitalism rejected. Medical research developed cheaper methods of treatment and techniques for care. Sweden nationalized racing, betting, gambling and liquor trade. Many nations are developing national railways, Air ways, city bus transports, tube rails, city underground transport and other facilities. Feeding children during school time and employees during working time is popular. Planning is greatest of techniques which benefits humanity. Swedish data banks have all information about its people's need for today as well as for future years. Human needs planned on a national scale from data bank. Sweden home of Swedish people and whole nation one Swedish family. TV and Radio broadcasting spread mass education to working classes. Swedish citizen hears radio and watch TV to compete with other nations. Sweden provides compulsory basic education and subsidized higher education. All citizens threatened of unemployment offered wages paid free training program till find a place in ever changing and advancing technological society. Population continuously retrained to be highly productive.

Technology and its power directed to produce welfare increase life expectation, pension age, living standards, health standards and housing standards. Townships, traffic, communication and other necessities of life improved. Sweden provides same standards of schooling to all children with freedom to hugs and for falling in love sex without unfair competition and strain. Swedish children fed in their schools and workers fed in working places led to excellent health. By child sex parties and teenage jobs children self-sustain at 16-years of age. Newly independent former colonies applied techniques in planning and reduced gap between advanced countries and newly independent countries. Singapore and Malaysia rapidly educated its younger population and established universities. Chinese 'Workaholic Patriotic Socialist (WPS)' employers established consumer industries while government established armament industries for basic defense needs. Modern nations are able to apply technology to defend their freedom, sovereignty and to establish an egalitarian society. Conjunction of state with military, financial, employment, medical and all other techniques of public importance continue to stabilize nations with military and civil administration. Civil administration remains permanently controlling nation irrespective of election of political parties.

SWEDISH TECHNIQUE:

Visit: www.lalithakabilan.com

Email: rkabilan1944 @
gmail.com

Swedish people improved farming sector and by labor market training centers continuously train people to suit to changing demands of industrial society. Women retained youth for longer period since deliver children in thirties and become better mothers. Swedish people do not show any hatred or displeasure to fellow workers and work as a unit. Peaceful coexistence prevailed in working places. This is admirable trait of Swedes. Cash in hands of an entrepreneur become power to develop industrial activities and entrepreneur brings power to money. So, Swedes search for true talents of industrialist and encourages people to become entrepreneur with enormous financial and technical aid even though they have large % of failures. 'Labor Market Training (LMT)' a Swedish notable contribution to modern industrial society shall be followed by India.

SALIENT FEATURES OF SWEDISH SOCIETY:

Swedish population grown from 4 million to 7 million during a period of 100 years. This is only 75% raise in population while in India increased by 400% in the same period. As population refused to grow Sweden imported one million people from other countries. Swedish reduced population growth and increased life expectation and health of Swedish people. Economic standards of Swedish people improved. Swedish town planning technique made greatest contribution to human welfare. Farm reorganization a model to all countries. Swedish people avoided many wars in recent history and developed a mild character. This is one of the most appreciable quality of Swedish people. Sweden a peace-loving nation, has capacity to mobilize one million soldiers to defend nation. Shelters built for 60% of their population against air raids and for an eventual atomic war. Swedish people well trained in civil defense as well as in fighting against occupying army and clever to avoid war with other countries.

SWEDISH 'FOLK HEM' SYSTEM:

Swedish people succeeded in establishing heavenly townships and cities. Well maintained cities claim 98.5% employment. Out of this 34% are employed in state enterprises or services. They provide state services in education, health care, old age pensions, religion and other areas of welfare. They developed a peace loving and ecology protectionist society. They built powerful industrial network of multi-national industries which established markets and production centers all over the world. Nation-wide unions organized for groups such as farmers, white collar workers, blue collar workers and industrialists. Swedish children receive rearing allowances. Wealth redistribution by inheritance tax and child tax concessions enabled citizens to maintain a good standard. Swedish even though live in cities, majority have a summer home in villages or in beautiful places to spend vacations. Believe nature best friend and protector and do not disturb animals and birds in their natural abodes. Swedish preserve forest by restricting Elk animal population to 100,000. Excess population periodically hunted by specific selections by forest department. Why don't India control cow population so that they will not endanger ecology of this nation? Indian who can foresee these problems awaken people and

lead people to solve global warming problems by short term and long-term plans.

GERMAN UNITY TECHNIQUE!

All German origin people well comes back to build one country and want to unit all German people under one flag and one Government. They are prepared to share wealth with suffering brothers. German society represents patriotic sentiments, hard work, discipline and devotion to unite Germans. German motto by working hard people do not die and working people live longer. In the same way 'Group Dining Facility (GDF)' members can serve fellow members and show Christian love to weaker members and support them.

'REFUGI, SPOUSE MUSLIM AND GREENCARDS (RSM&G)':

'Afro, Asian, Latino and Muslim (AAL&M)' nations rapidly depopulate by maximum SCL and 35-year motherhood. Let youngster RSM&G living in 60 CEN plans to return to homelands urban areas to build global trade before year 2100. CEN evict retired RSM&G and 'Non- Resident Indians (NRI)' with pensions to re-emigrate to homeland KFR GDR to rebuild RF to reduce 'Global Warming (GW)' to save mankind. Youngster 'Non-Resident Indians (NRI)' plan to re-emigrate to homeland urban areas to build global trade centers before year 2100. Let CEN employ on 10 years contract AAL&M national 'Double Income No Kids (DINK)' 'Social Patriots (SP)' professionals to devote life to develop CEN education, farming, healthcare, horse stables and industries without making inroad in CE family life and invest employment savings in KFR GDR to develop Indian RF to reduce GW. Serving CEN develop science and technology and assist CEN remain global leaders will help mankind development.

46	<p>Sweden home of Swedish people and whole nation one Swedish family. TV and Radio broadcasting spread mass education to working classes. CHAPTER 11

HOW TO BUILD FEMINISTAFRO, ASIAN, LATINO AND MUSLIMNATIONS?

In adult franchise capitalist funded electioneering democracy political speakers attracted masses by their speeches or by writings became politicians. Political speakers and writers did not have money for political activity. Politician lacking lifelong assured vocation with pay corrupted political life. Politician squandered national wealth to build vote banks and politician was exploited by capitalists for hoarding amassed black money. Bureaucracy is administration by technician and it bettered many societies and proved to be most efficient tool during British rule but after independence Indian politicians corrupted bureaucracy. Bureaucrats who issued licenses or favored people or granted permits and licenses to capitalists amassed wealth. Politicians collected money for appointment, postings and transfer of bureaucratic government servants. In TamilNadu voters expected payment direct money for casting ballots. Indirect by subsidy and free gifts made nation insolvent. Politician and vote banks colluded and swindled TamilNadu state.

For correcting this defect 'Double Income No Kids (DINK)' 'Socialist Patriot (SP)' pair given undertaking to surrender parental inheritance to military 'Socialist Trust (ST)' recruit and train to take up service with half professional work load to function as lifelong politician with nominating rights by living under monitoring in 'Group Dining Residencies (GDR)'. DINK SP appoint in education, religion, judiciary, media, 'Group Dining Facility (GDF)' and GDR. Five pairs DINK SP serving urban nucleus of about 10,000 populations or rural nucleus populations of 5000 area nominate 6th pair as nominee for DINK 'Socialist Patriot Elected (SPE)' and amongst nominee one pair select by lots as DINK SPE of nucleus and rules nucleus as president.

During education students take up preliminary student training for specific national bureaucratic service. After completing minimum of certificate courses build DINK 'Trainee Educated Pairs (TEP)' to seek two years national bureaucratic mandatory service jobs in lifetime before taking up a carrier so as to qualify as DINK 'Socialist Citizen (SC)' eligible to take driver license, passport, father or mother one single child after 34 years age, etc. They can serve up to class IV and Class III of 'Military Bureaucracy Service (MBS)', CNS, CPS, CTS, CSS, CPS, CMS etc. for two year and live in military barracks under vigilance to become DINK SC.

DINK SC five pairs select the 6th pair as nominee to serve MBC class II. Amongst nominees required numbers select by lots to replace retired. They will be called trainee DINK 'Socialist Patriot Volunteer (SPV)' and after five year-service become DINK SPV. Five DINK SPV nominate 6th DINK SPV as nominee for MBC class I and amongst nominated required numbers selects by lots to serve as trainee DINK 'Socialist Patriot Lifetime (SPL)'. After 5 year-service elevates as DINK SPL. Thus, all higher cadres of government employment selected. 'Member of Parliament (MP)'

Email: rkabilan1944 @
gmail.com

Visit: www.lalithakabilan.com

constituency area DINK SPE and DINK SPL five pairs nominate 6th pair as nominee for MP and amongst nominees one pair selects by lots as constituency MP pair.

Government develops safer childbirth reduction methods at a reasonably inexpensive cost to help people to abide Mao maximum SCL; child bearing after 34 years of age to depopulate India to year 1950 level. Indian childbearing people forbid to migrate to earn a living from overseas employment. Only 'Double Income No Kids (DINK)' 'Socialist Patriots (SP)' surrendered inheritance to military 'Socialist Trust (ST)' willing to invest savings for 'Kibbutz Farm Resorts (KFR)' 'Rain Forest (RF)' program only take up 10 years foreign service as technician or professional @ 1/3 PCI job of that country. DINK SP employ in existing education, religion, judiciary, GDF, GDR and media jobs with half existing work load to remain politicians. Government use mineral and oil wealth to industrialize nation. Women take up productive work. Combined savings of men and women increase capital accumulation and lead to investments in mutual funds and in Banks. During national service every DINK SP remain either normal pair or gay pair or lesbian pair. Normal pairs can only be staff of primary and high schools. Pairs cannot conceive below 34 years of age and if conceive after 34 years of age grants pension for national service and surrendered inheritance returns to start life.

New regulation for hire and fire capitalist is to function as 'Leader Socialist Patriots (LSP)' employer investing profits for expansion and diversification. Shall not invest on luxury homes, cars, yachts, casino gambling, luxury dresses, marriages, trusts etc. Pays PCI pay to loyal employees and pay 0,35 PCI for non-dedicated unemployable but offer lifetime employment. If employ less than 10 employees live in 30 SM DBAF with GDF. Employ secretary cum servant and car driver. Hindus capitalist caste inter-marry qualified low caste poor spouse; bear and raise child after 34 years age of mother and raise till 18 years of age of child with disciplined family life with good relations with elders to inherit grandparent's land, commerce, industry and wealth. This continues for 3 generations then low caste disappears if one spouse upper caste then child is upper caste. By year 2100 if any remain puritan capitalist upper caste forego all land, commerce, industry and wealth to state. They function as scavengers.

Government owned and selected aided trust institutions convert as 'Technology Education Institutions (TEI)'. They Europeanize sex drives, homogenize children and increase childbirth age of educated above 34 years of age. Existing large Hindus temples replace some idol gods by statues of Buddha, Mahaveer, Christian altar and a mask. Intermediary between idol god and Hindus worshipper eliminates by enforcing Shinto worship. All religious people enter temple to worship their favorite gods! Beef one of costlier eaten meats shall not be prevented to eat by Muslim and others. If beef eaten, cattle breeding adds to income of Hindus farmers. Every year about fifty million cows die and meat is wasted. This can reduce poverty of farmers. Hindus and Muslims emulate President Abdul Kalam, a son of Muslim fisherman by focusing his super love for his job-built atom bombs,

missiles and launched satellite.

Indians follow Swedish child sex parties and teenage jobs that self-sustains boys and girls at 16-years. Adults adopt Swedish dating culture to increase first childbirth age of mothers to 35-years of age and abide Mao maximum SCL; mothers 4-hours job and others 6-hours jobs per day and rural folk work 6-days a week. Training, educating and motivating women to postpone delivery of first child to later periods of motherhood and encouraging men to become father in their later period of fatherhood is essential. Create sharing facilities to sew cloths as well as in many other interests of woman. Create facilities in fine arts such as music, dance and health care activities. India by year 2100 instead of exploding to UN estimate of 1701 million reduces to socialist Hindus 313 million, Muslims 37 million and others 22 million so as to rebuild 'Rain Forest (RF)' in 66% of 'Farmer cultivated Lands (FCL)' to revive monsoon rains and reduce 'Global Warming (GW)'.

CHAPTER 12

RURAL MODERNIZATION!

Indian villages inhabited continuously for thousands of years and existed independently by producing their own food and manufacturing own consumer products. Village level economy built by farming, trading and services. Village collected its tax due to government and paid into the treasury. Village administered by traditions. Bharatha Desam kingdoms united by British as India and eminent British economists trained Indian civil service personnel. These economists initiated social transformations in an orderly manner and built corruption free governing. As British developed roads and railways farmers marketed goods and bought factory made goods. Continuously population level increased and village jobs shrank due to capitalist's mechanization of cattle powered farming, transport and handy-craft weaving vocations. Unemployed villagers migrated to British colonies like Tamils coolies seeking jobs. Now farmers are migrating to 87 countries for employment. Many families have connections with Malaysia, Singapore and Middle East. During overseas services, villagers joined 'Indian National Army (INA)', the militant wing of freedom fighters.

During years 1930 to 1990 farming population multiplied by three-fold. Half a million village communities spread all over India. India has 110 million independent farms with an average land holding of 1.5 hector 'Farmer Cultivated Lands (FCL)' out of which 75% dry crops and 25% wet crops. About 500 million people dependent share-holders of these farms. By year 2000, average daily income of a member of these farming family five rupee a day. Further 200 million villagers seek jobs in 110 million farms. Due to global warming by year 2030 irrigation water supply reduces by 1/3 and summer dry crop yield reduces by 25%. By year 2100 summer peak temperature increases above 5.6-degree C and summer dry crops uneconomical. Farmers of Pakistan and Northern India will suffer from draught, heat wave and epidemic diseases like Dengue, Cancer etc. Farmer educate to reduce insecticide and herbicide sprays to reduce cancer for people who may be consuming their products. They shall build sanitary facilities in farm so that vegetables are not contaminated. Farmer make compost out of organic matter; follow American practice of spreading hay or wood chips on root area to prevent growth of weed and to preserve soil moisture. Ecological friendly farmer will not burn any organic matter but compost as manure or spread them over root zone to retain moisture.

Study of a group of socialistic joint families during 90 years period revealed enormous population growth. Indian farmers did not adapt technics for lowering birth rate. Higher than death rate birth reduced 'Per Capita Farming Land (PCFL)' of farming family members. In TamilNadu Kongu Farmers only reduced childbirth as and when monsoon failed and water depleted in wells. So, they protected ecology of India. But others become non-viable. Only if 10 million become viable by enlarging

land holding to ceiling limit by Swedish farm modernization technique then only India can combat 'Global Warming (GW)'.

Village agricultural productions such as paddy, coconuts, peanut, tapioca, fruits, vegetables, banana, flowers, toddy and wine evaluate for quantity and value. Foreign employment remittances and urban earnings are also source of income. Existing regular jobs in village and irregular work available in a year would enlighten period of unemployment and peak employment periods. If farm's daily employment potential identifies then idleness estimates. By analyzing them plan for full employment. Engage rural school children in farming activities during peak agricultural operations and train them in rural teenage jobs for self-sustaining.

South American 80% of population lived in few cities. SriLankan 80% population lived in Colombo. Military recruit rural non-viable farm youngster inter-pairs of non-viable farms for 'Labor Market Training (LMT)' jobs to urbanize as inter-pairs in urban retiree homes converted as 'Group Dining Residencies (GDR)'. Non-viable farm youngster as inter-pairs will be free to choose new trade in urban area. Non-viable farm elders absorb as employees of KFR. Retired city dwellers evict by law to migrate to KFR to spend their last period of life with nature. Money flow of retired into villages finances to rebuild RF. Retired RSM&G pensioners return to KFR GDR of their choice to build RF. KFR rebuild 66% of 'Farmer Cultivated Lands (FCL)' into 'Rain Forest (RF)' by employing non-viable farms elders. Urban retirees evicted from urban homes live in KFR 'Group Dining Residency (GDR)'. Urban retirees choose KFR and live in simple retiree GDR to engage in building Rain Forest (RF)' by investing life savings. Future of India depends on how KFR rebuild RF to combat global warming and how non-viable farmers urbanize to save ecology of India. Population explosion in villages threaten to destroy economy and ecology. Upper class Tamils Gounder community of Coimbatore by dedicated hard work solved problem of water shortage, industrialization and mechanization of farming a model for global populations to maintain 'Green Vegetative Shield Volume Coverage (GVSVC)' of mother earth. Women do major agricultural work, reduced cooking time, child delivery and raised age for first delivery and men learned new trades.

Military enforce Mao maximum SCL; Swedish 35-years motherhood to farming families. Like Japanese Samurai Kings, farmers as custodian of Earth take responsibility and come-forward to make sacrifices to plan for million years of life for mankind on Mother Earth. Every 110-farming household cluster build one 'Kibbutz Farm Resort (KFR)'. Every farming family surrender 2/3 of FCL to KFR to convert as national 'Rain Forest (RF)' with huge trees of past decades. Viable-Farmers follow Jewish intensive cultivation in 1/3 of FCL with minimum of ground water pumping and raise water table to reduce desert spread. Village establish a workshop and provide basic training to use machinery and equipment for various farming and construction activities required for viable farmers. To become viable farmer, learn carpentry, plumbing, pipe laying, masonry, farm machinery operation and maintenance. Farmer learns techniques to design and construct viable farmer

temporary homes. Educate farmers in self-help program such as building kitchen, bathroom, toilet with septic tank, cattle shed, fence, drip irrigation, sprinkler irrigation, overhead tank, laying water pipe line, plant nursery and other activities. Impart special training to viable-farmers to read drawings, learn budgeting, costing and profit evaluation.

CHAPTER 13

'GROUP DINING RESIDENCY AND GROUP DINING FACILITY'

TamilNadu provides free rice and subsidized provision for family, Pongal presents and Amma hotels gives subsidized hotel food. Now catering is very well advanced. Single women cook and serves 50 people in temple free food program. By diverting family ration to 'Group Dining Facilities (GDF)' and 'Group Dining Residencies (GDR)' force people eat together which homogenize and equalize citizens. It can introduce many amenities of life to incorporate Kibbutz facilities. Change-over to Sai-Baba proven love all and serve all philosophy by building GDF to cook in modernized kitchen cum-dining hall with food processing equipment, steam boilers and trolley for serving food for group of families. People train to cook, cut vegetables and make dishes. Iddly and Dosai make in Iddly Shop techniques. People train to serve dishes, help in food processing, cleaning mess hall, cleaning plates and dish wash cooking vessels. GDF utilize solar energy for cooking and developing many varieties of food which can be cooked with solar energy may reduce the carbon-dioxide emission. The world's ecology development funds invest in developing countries to introduce solar cooking in GDF and in GDR to reduce burning of fire wood and cooking gas producing carbon-dioxide. Steam cooking can be used for rice, vegetables and Iddly. Women frees from domestic servitude to take up employment. GDF will eliminate inequality of male and female and it be mandatory for every Indian to take up hour of community daily service by abiding Sathya Sai 'Love all and serve all' for bettering GDF/GDR. Farmers sharing GDF share one common well and pump set for kitchen garden and share general maintenance in specified order. Single child families provide an opportunity for children to have play mates and relieves much problem of parents. Share better and hygienic playground, reading rooms, educational facilities and guidance. Qualified members train to maintain accounts and statistics. Auditors check accounts and transactions of GDF.

Data bank sources of information are voters list containing all adult members above age of 18 years. Aadhaar contain individual data. House numbering and street numbering identify entire village homes. Population census covers total population. Collect population strength for every 'Group Dining Facility (GDF)' in village. Village land owner list provides information about independent land owners and their land holding. But in a family many members may have ownership titles but may run farm collectively. So, actual groups would be less than land owners list. So, identify socialist joint family groups and collective families that carry out farming operations in one area. Village survey map provides detailed division of land, details of river, lake, ponds, canals and other of village. Village house tax register gives house tax levied and ration cards provide list of nuclear families. Plan GDF with common amenity such as toilets cow sheds, compost yards, modern

kitchen, children's study center, overhead tank with water supply pipes and kitchen gardens. Village plan as a township with many GDF.

Common activities are taking cattle to grass field. If a farmer takes two cattle to grass field and watches them for a whole day it will cost him half man day per cattle. But if cattle are trained to live as a herd, a man can manage fifty cattle. In rural areas farmers can share many essentials of a farming family such as cow shed for all GDF member cattle as herd which reduces cost of maintaining independent hay stacks, fodder, hospital care, milking, taking to meadows for fresh natural grass with exercise. They may have common cow dung pit for all cattle. Use cow milking equipment to milk cows in morning and evening; send milk collectively.

Existing homes larger than 75 'Square Meter (SM)' convert as 'Group Dining Residencies (GDR)' and all new home constructions consist of 35 SM suits for parent with a child and 45 SM suits for elderly pair after adults left to seek independent life. This creates close-knit community sharing pleasures of life.

CONCLUSION

Nations which refused to apply state control and direct technique and technology for welfare of its people had their GNP growth become low and got stagnated. Creativity of citizens reduced. Export market per head diminished continuously. Imports more than exports. Industries progressively taken over by foreign companies. NRI retired RSM&G pensioners send back to KFR GDR of homeland to build RF. RSM&G youngster NRI plan to re-emigrate to homeland urban areas before year 2100 to build global trade centers. DINK SP take up 10 years overseas contract services in 60 CEN to serve in education, industries, commerce, horse stables and remit savings to KFR for building RF. Let none make inroad in CE family life. Happiness of CE will bring prosperity to mankind!

49	In democracy politicians attracted masses by their speeches or by newspaper articles. Political speakers and writers did not have money to establish adult Franchise Democracy funded political activity and for family maintenance. Did not have regular paid vocation in, religion, media, judiciary etc. Capitalists exploited politician and swindled national wealth. Politicians collected money for appointment, postings and transfer of bureaucratic government servants and amazed black money. Politicians by free gifts to voters-built vote banks. In TamilNadu voters expected money for casting ballots.	From year 2020, 'Double Income No Kids (DINK)' 'Socialist Patriot (SP)' pair surrendered inheritance to military 'Socialist Trust (ST)' recruit by military and train to take up service with half professional work load in existing education, religion, judiciary, GDF, GDR and media jobs to function as lifelong politician with nominating rights by living under monitoring in 'Group Dining Residencies (GDR)'. Five pairs DINK SP serving urban nucleus of about 10,000 populations or rural nucleus populations of 5000 area nominate 6 th pair as nominee for DINK 'Socialist Patriot Elected (SPE)' and amongst nominee one pair select by lots as DINK SPE
50	Bureaucracy is administration by technician and it bettered many societies and during British rule proved to be most efficient tool but after independence Indian politicians corrupted bureaucracy so that bureaucrats favored people or granted permits and licenses to capitalists amassed wealth to enrich politicians.	By year 2020, students select national bureaucratic services and take up student training for specific service. They build DINK 'Trainee Educated Pairs (TEP)' to seek national bureaucratic mandatory two years-service jobs and live in 'Group Dining Facility (GDF)' to become 'Socialist Citizen (SC)' before taking up a carrier.
51	Government develops safer childbirth reduction methods at a reasonably inexpensive cost to help people to abide Mao maximum SCL; Swedish 35-years mother-hood to depopulate India to year 1950 level. Indian childbearing people forbid to migrate to earn a living from overseas employment.	By year 2020, 'Double Income No Kids (DINK)' 'Socialist Patriots (SP)' surrendered inheritance to 'Socialist Trust (ST)' invest savings for 'Kibbutz Farm Resorts (KFR)' 'Rain Forest (RF)' take up 10 years foreign service and remit savings to KFR GDR to build 'Rain Forest (RF)'.
52	From year 2020, Hindus capitalist caste inter-marry qualified low caste matching spouse; bear and raise child after 34 years age of mother and raise child till 18 years of age with disciplined family life with good relations with elders to inherit grandparental wealth. This continues for 3 generations then low caste disappears if one spouse upper caste then child is upper caste.	From year 2020, hire and fire capitalist function as 'Leader Socialist Patriots (LSP)' employer. They shall not invest profit on luxury homes, cars, yachts, casino gambling, luxury dresses, marriages, trusts etc. Pays PCI pay to loyal employees and pay 0,35 PCI for non-dedicated unemployable but offer lifetime employment. If employ less than 10 employees

	Profits invest for expansion and diversification.	live in 40 SM DBAF with GDF. Employ secretary, servant cum car driver.
53	From year 2020, existing large Hindus temples replace some idol gods by statues of Buddha, Mahaveer, Christian altar and a Mask. Intermediary between idol god and Hindus worshipper eliminates by enforcing Shinto worship. Religious people may worship gods with Shinto nationalistic prayers!	From year 2020, Muslim shall not be prevented to eat beef. Every year about fifty million cows die and meat is wasted. This can reduce poverty of farmers. Hindus and Muslims emulate President Abdul Kalam, a son of Muslim fisherman by focusing his super love for his job-built atom bombs, missiles and launched satellite.
54	From year 2020, government owned and selected aided trust institutions convert as 'Technology Education Institutions (TEI)' to Europeanize sex drives, homogenize children and increase childbirth age of educated above 34 years of age. Indians follow Swedish upbringing techniques that self-sustains boys and girls at 16-years of age by teen age jobs and child sex parties.	From year 2020, abide Mao maximum SCL; Swedish 35-year motherhood. India by year 2100 instead of exploding to 1701 million reduces Hindus to 313 million, Muslims 37 million and others 22 million so as to rebuild 'Rain Forest (RF)' in 66% of 'Farmer cultivated Lands (FCL)' to revive monsoon rains and reduce 'Global Warming (GW)'.
55	Study of a group of socialistic joint families during 90 years period revealed enormous population growth. Indian farmers did not adapt techniques for lowering birth rate below death rate for increasing 'Per Capita Farming Land (PCFL)' of farming family members. Farmers become non-viable. From year 2020, urban retirees evict from urban homes live in KFR 'Group Dining Residency (GDR)' simple retiree home engage in RF.	From year 2020, Non-viable farm youngster as inter-pairs will be free to choose new trade in urban area. Non-viable farm elders absorb as employees of KFR. KFR rebuild 66% of 'Farmer Cultivated Lands (FCL)' into 'Rain Forest (RF)' by employing non-viable farms elders. Every farming family abides Mao maximum SCL; 35-year motherhood; surrender 2/3 of FCL to KFR to convert as RF' with huge trees of past decades.
56	From year 2020, farmers like Japanese Samurai Kings take responsibility as custodian of Earth by coming-forward to surrender 2/3 FCL to plan for million years of life for mankind on Mother Earth. Every 110-farming household cluster build one 'Kibbutz Farm Resort (KFR)'. KFR nationalize non-viable FCL and employ elders in GDR and etc.	From year 2020, viable-farmers follow Jewish intensive cultivation in 1/3 of FCL with minimum of ground water pumping to reduce desert spread. Village establish a workshop and provide basic training to use machinery and equipment for various farming and construction activities required to become viable farmer
57	From year 2020, existing homes larger than 40 'Square Meter (SM)' convert as 'Group Dining Residencies (GDR)' and all new home constructions consist of 30 SM suits for parent with a child and 40 SM suits for elderly pair after adults left to seek independent life.	From year 2020, by diverting family ration to 'Group Dining Facilities (GDF)' and 'Group Dining Residencies (GDR)' homogenize and equalize citizens. GDF creates close-knit community sharing pleasures of life. Everyone takes up mandatory hour of GDR service
58	If cattle trained to live as a herd, a man can manage fifty cattle. In rural areas farmers can share many essentials of a farming family such as cow shed for all GDF member cattle as herd which reduces cost of maintaining. They may have common cow dung pit for all cattle. Use cow milking equipment to milk cows and send milk collectively.	Nations which refused to apply state control and direct technique and technology for welfare of its people had their GNP growth become low and got stagnated. Creativity of citizens reduced; export market per head diminished continuously. Imported more than exports. Industries progressively taken over by foreign companies.
